

# Teledyne Microwave Solutions Awarded Contract from NAVSUP

RANCHO CORDOVA, Calif. – Teledyne Microwave Solutions (TMS), a business unit of the Teledyne Defense Electronics Group and its parent company, Teledyne Technologies, has been awarded a \$7.5 million sole-source contract from the Naval Supply Systems Command (NAVSUP) Weapon Systems Support in Philadelphia, the company said in a Nov. 15 release.

The contract is for the repair of Traveling Wave Tubes (TWTs) used on the ALQ-99 system in support of the EA-18G Growler aircraft. Teledyne, a long-time world leader in the design and production of advanced TWTs, has supported the ALQ-99 system and its associated aircraft since the 1970's. Teledyne's engineering innovations in TWT technology continue to be deployed today to meet the stringent requirements of the U.S. Navy and other military purposes.

Execution of this firm-fixed-price contract award will be performed at Teledyne's 160,000-square-foot production facility in Rancho Cordova, California. TMS is expected to complete the contract work by November 2021.

TMS manufactures a broad range of TWT technologies and applications for use in diverse markets. Teledyne TWTs are found on nearly all major electronic warfare, radar, and communication platforms of the U.S. and its allies throughout the world. Our various product lines also include TWTs used for instrumentation, satellite communications, and other mission critical applications.
