ARLINGTON, Va. – Naval Air Systems Command awarded Airbus U.S. Space & Defense a Phase I Other Transactional Authority Agreement, through Naval Aviation Systems Consortium, in support of the United States Marine Corps Aerial Logistics Connector.

The award is part of a Middle Tier of Acquisition (MTA) Rapid Prototyping Program which aims to provide the Marine Corps with prototypes to demonstrate the aircraft's capabilities to the warfighter through a series of operational experiments. The Airbus U.S. UH-72 Unmanned Logistics Connector, a variant of the proven Lakota platform, is intended to provide logistical support during expeditionary operations within contested environments.

“Our unmanned UH-72 logistics connector leverages nearly two

decades of U.S. military capability and offers Marines a versatile, affordable and enduring solution to address logistics missions around the globe,” said Rob Geckle, chairman and CEO of Airbus U.S. Space & Defense. “We look forward to supporting the Marine Corps with this latest modernization of the Lakota platform.”
