

# HII AWARDED \$244 MILLION CONTRACT TO INTEGRATE MINOTAUR SOFTWARE PRODUCTS INTO MARITIME PLATFORMS

[Release from HII](#)

\*\*\*\*\*

## *Contract Extends HII's ISR Mission Support Across Domains*

MCLEAN, Va., (Oct. 17, 2023) – HII (NYSE: HII) announced today that its Mission Technologies division was awarded a \$244 million task order to integrate Minotaur software products into maritime platforms for the U.S. Navy, U.S. Marine Corps and U.S. Coast Guard.

HII was awarded this contract under the Department of Defense (DoD) Information Analysis Center's (IAC) multiple-award contract (MAC) vehicle. IAC MAC task orders are awarded by the U.S. Air Force's 774th Enterprise Sourcing Squadron to

develop and create new knowledge for the enhancement of the Defense Technical Information Center repository and the research and development and science and technology community.

Under the Naval Air Systems Command task order, HII will perform research, development, test and evaluation to facilitate the integration of Minotaur Family of Services products into the services' maritime platforms to meet intelligence, surveillance and reconnaissance warfighting requirements.

Minotaur products support the warfighter by enhancing sensor performance and presenting data from multiple types of sensors, including radar and C5ISR equipment, into a single common operating picture and transmitting that data to other platforms and units during operations.

HII has been the first and only industry prime developer of Minotaur since the program was first awarded to industry in 2020.

The contract has a five-year period of performance, with work conducted at contractor facilities in various U.S. locations.

"HII has been at the forefront of Minotaur software development for nearly a decade," said Andy Green, executive vice president of HII and president of Mission Technologies. "It's a privilege to continue this mission-critical work and to concurrently deliver the advantage to three branches of the Armed Forces."

"We are pleased that the Navy has selected this proven technology to meet the combined requirements of next-generation Navy, Marine Corps and Coast Guard ISR platforms," said Todd Gentry, president of Mission Technologies' C5ISR business group. "We have assembled an outstanding team and look forward to expanding our longstanding partnership with the Navy and supporting the tri-service maritime strategy."

# U.S. Coast Guard Cutter Campbell Returns Home following 75-day Patrol

[Release from U.S. Coast Guard Atlantic Area](#)

\*\*\*\*\*

Oct. 16, 2023

NEWPORT, R.I. – The crew of the U.S. Coast Guard Cutter Campbell (WMEC 909) returned to their home port in Newport, Friday, following a 75-day multi-mission patrol to the South Florida Straits and Windward Passage.

Campbell deployed in support of Homeland Security Task Force – Southeast and Operation Vigilant Sentry within the Coast Guard Seventh District's area of responsibility. Campbell's crew conducted maritime safety and security missions while working

to detect, deter, and intercept unsafe and illegal maritime migration ventures bound for the United States. Over the course of the patrol, Campbell's crew rescued, cared for and repatriated 111 migrants.

Notably, Campbell teamed up with U.S. Coast Guard Cutter Valiant (WMEC 621) for a search and rescue and law enforcement operation ahead of Hurricane Idalia. While transiting 70 miles east of Tybee Island, Georgia, Valiant located a makeshift hydro-pod vessel adrift. The vessel operator refused a Coast Guard Captain of the Port order to return to port due to a manifestly unsafe voyage. Campbell arrived on scene and facilitated the operator's safe evacuation from the vessel less than 24 hours prior to the arrival of tropical storm force winds and seas.

"I am very proud of everything the Campbell and our crew accomplished this patrol, from protecting mariners from the treacherous seas of tropical cyclones to standing the watch along our southeast maritime border," said Cmdr. Jonathan Harris, commanding officer of Campbell. "This crew continues to live up to the ship's motto of 'Pride – Tradition – Readiness' as we celebrate 35 years of Campbell's service to our nation."

HSTF-SE serves as the Department of Homeland Security lead for operational and tactical planning, command and control, and acts as a standing organization to interdict illegal maritime migration attempts with federal, state and local partners. HSTF-SE continues enhanced enforcement efforts in support of OVS, the 2004 DHS plan to respond to irregular and unlawful mass maritime migration in the Caribbean Sea and the Florida Straits.

Campbell is a 270-foot, Famous-class medium endurance cutter. The cutter's primary missions are counter-narcotics operations, migrant interdiction, living marine resources protection, and search and rescue in support of U.S. Coast

Guard operations throughout the Western Hemisphere.

For information on how to join the U.S. Coast Guard, visit [GoCoastGuard.com](https://www.go CoastGuard.com) to learn about active duty, reserve, officer, and enlisted opportunities. Information on how to apply to the U.S. Coast Guard Academy can be found [here](#).

## 24th Marine Expeditionary Unit Composites for Deployment

U.S. Marine Corps Col. Todd Mahar, commanding officer, 24th Marine Expeditionary Unit (MEU), speaks during the 24th MEU's composite ceremony on Camp Lejeune, North Carolina, Oct. 12, 2023. The 24th MEU Command Element gained the subordinate

elements of Battalion Landing Team 1/8, serving as the ground combat element; Combat Logistics Battalion 24, serving as the logistics combat element; and Marine Medium Tiltrotor Squadron (VMM) 365 (reinforced), serving as the aviation combat element. (U.S. Marine Corps photo by Lance Cpl. John Allen)  
By [Sgt. Jacqueline Peguero-Montes](#), [24th Marine Expeditionary Unit](#) , 12 Oct 2023

MARINE CORPS BASE CAMP LEJEUNE, N.C. – The 24th Marine Expeditionary Unit formed as a Marine Air-Ground Task Force, signified with a composite ceremony, Oct. 12, 2023 at Camp Lejeune.

The 24th MEU Command Element gained the major subordinate elements of: Battalion Landing Team 1/8, serving as the Ground Combat Element; Combat Logistics Battalion 24, serving as the Logistics Combat Element; and Marine Medium Tiltrotor Squadron (VMM) 365 (Reinforced), serving as the Aviation Combat Element.

“This composite ceremony signifies that we are a MAGTF,” said Col. Todd Mahar, commanding officer of the 24th MEU. “We are the team of teams coming together to enter our pre-deployment training program alongside our Navy brothers and sisters. Together, we will train and prepare for a worldwide deployment at a moment’s notice.”

The composite ceremony marks the official start of the 24th MEU’s pre-deployment training program. The training cycle will soon transition from Marine Corps mission-specific training to Navy/Marine Corps joint training evolutions alongside Amphibious Squadron 4 prior to its deployment. For its sea-based training, the 24th MEU will embark aboard the Wasp Amphibious Ready Group, providing the nation with a flexible, maneuverable, and adaptable option for deterrence, sea denial, and crisis response.

“We are ready to begin the pre-deployment training program,

with our amphibious ready group partners, as we train and prepare for worldwide deployment at a moment's notice," said Col. Mahar in his remarks to the formation. "The next six months of the PTP will prepare us for anything that comes our way; however, we have the watch now, and are prepared to respond to a crisis requiring the MEU."

First activated in 1971 as the 34th Marine Amphibious Unit, the unit was later redesignated as the 24th MEU in 1988. The 24th MEU has participated in humanitarian operations and conflicts including Operation Southern Watch, Resolve Resolute, Operation Iraqi Freedom, Operation Enduring Freedom, and Operation Unified Response. The 24th MEU most recently deployed in 2021 and supported the evacuation at Hamid Karzai International Airport, Afghanistan.

The 24th MEU bears a profound honor and solemn duty as a crisis response force, dedicated to upholding timeless traditions and being ever-prepared to answer the nation's call, even in the most unforeseen and challenging circumstances.

## **12th Marine Regiment to be Re-Designated 12th Marine Littoral Regiment**

Release from Headquarters, U.S. Marine Corps

\*\*\*\*\*

WASHINGTON, D.C. – To support the United States and Japan’s commitment to a free and open Indo-Pacific, 12th Marine Regiment will redesignate to 12th Marine Littoral Regiment (MLR) on November 15, 2023. The redesignation will mark the next historic chapter in the Marine Corps’ commitment to designing a force that is prepared to effectively respond to the challenges of the contemporary global security environment and serves as a testament to the regiment’s role in the Marine Corps’ global employment.

This redesignation follows the Joint Statement of the Security Consultative Committee (“2+2”) which announced that 12th Marines would remain in Okinawa and redesignate to 12th MLR by 2025. The statement affirmed the MLR’s purpose to “bolster deterrence and provide a stand-in force that is able to defend Japan and quickly respond to contingencies.”

The Marine Corps remains committed to the basic tenets of the 2012 Defense Policy Review Initiative Realignment Plan. No new

units will be added to Okinawa under the agreement. This is strictly a redesignation of an existing unit on Okinawa in accordance with Marine Corps modernization efforts.

12th Marine Regiment is currently participating in exercise Resolute Dragon 23.2, which takes place from October 14-31 across multiple locations in Japan. During Resolute Dragon, 12th Marines will distribute in a similar manner to what is designed for the MLR: They will deploy to Japan's Southwest Islands, Kyushu, and Hokkaido, provide sensing capabilities in a simulated battlespace, and integrate joint force firepower with our Japanese ally's capabilities.

**Coast Guard Cutter Valiant  
returns home after \$30  
million drug seizure, rescue  
of 2**

## [Release from U.S. Coast Guard Atlantic Area](#)

\*\*\*\*\*

Oct. 16, 2023

### **Coast Guard Cutter Valiant returns home after \$30 million drug seizure, rescue of 2**

U.S. Coast Guard Atlantic Area

MAYPORT, Fla.— The crew of the U.S. Coast Guard Cutter Valiant (WMEC 621) returned home, Thursday, to Naval Station Mayport after completing a 49-day deployment in the Atlantic Ocean, Caribbean Sea, and Florida Straits.

Patrolling in support of the Homeland Security Task Force – Southeast’s Operation Vigilant Sentry and Joint Interagency Task Force-South, in the Seventh Coast Guard District’s area of responsibility, Valiant’s crew conducted maritime safety and security missions.

During the patrol, Valiant assisted two lives at sea during two separate search and rescue cases.

The cutter's crew also conducted counterdrug operations, interdicting one go-fast vessel with over 97 pounds of cocaine and assisting international partners, the Royal Netherlands Navy patrol vessel HNLMS Groningen (P843), with two additional interdictions. Throughout the patrol, Valiant seized or assisted in the seizure of more than \$30 million in illegal narcotics.

Valiant's crew later transitioned to migrant interdiction operations and embarked and cared for over 50 migrants in the Florida Straits.

"Valiant's crew had an exceptional patrol," said Lt. Kristian Sova, Valiant's operations officer. "We participated in multiple Coast Guard mission sets, combatting the illegal trafficking of drugs and saving lives at sea. We look forward to getting home and celebrating with our families."

Detecting and interdicting illegal drug traffickers on the high seas involves significant interagency and international coordination. JIATF-South in Key West, Florida, conducts detection and monitoring of aerial and maritime transit of illegal drugs. Once interdiction becomes imminent, the law enforcement phase of the operation begins, and control of the operation shifts to the U.S. Coast Guard throughout the interdiction and apprehension process. Interdictions in the Caribbean Sea are performed by members of the U.S. Coast Guard under the authority and control of the Coast Guard's Seventh District, headquartered in Miami.

Valiant is a 210-foot, Reliance-class medium endurance cutter. The cutter's primary missions are counter-drug operations, migrant interdiction, enforcement of federal fishery laws, and search and rescue in support of U.S. Coast Guard operations throughout the Western Hemisphere.

For more information on Valiant, visit <https://www.atlanticarea.uscg.mil/Area-Cutters/CGCVALIAN I/>.

For information on how to join the U.S. Coast Guard, visit [GoCoastGuard.com](http://GoCoastGuard.com) to learn about active duty, reserve, officer, and enlisted opportunities. Information on how to apply to the U.S. Coast Guard Academy can be found [here](#).

## **General Dynamics Electric Boat Awarded \$217 Million Contract for Virginia-Class Submarines**

Release from General Dynamics Electric Boat

\*\*\*\*\*

Groton, Conn. (October 16, 2023) – General Dynamics Electric Boat, a business unit of General Dynamics (NYSE: GD), announced today it was awarded a \$217 million [contract](#) for long lead time material associated with the construction of Virginia-class submarines SSN 814 and SSN 815.

“This contract will enable Electric Boat to begin the acquisition of critical material and components for submarines that require substantial lead time to manufacture and deliver,” said Kevin Graney, president of General Dynamics Electric Boat. “Advanced procurement is essential to achieve the high-rate production the Navy requires of the submarine industrial base. A consistent demand signal is necessary for our suppliers to invest in and grow their operations.”

General Dynamics Electric Boat is the prime contractor and lead design yard for the Virginia class and constructs the ships in a teaming arrangement with HII’s Newport News Shipbuilding in Virginia.

**C4F’S HYBRID FLEET COMPLETES  
TARGET DETECTION TEST**

[Release from USNAVSOUTH/4TH FLEET PUBLIC AFFAIRS](#)

\*\*\*\*\*

C4F'S HYBRID FLEET COMPLETES TARGET DETECTION TEST

[By USNAVSOUTH/4TH FLEET PUBLIC AFFAIRS](#)

17 October 2023

KEY WEST, Florida – Joint Interagency Task Force South (JIATF-South) and Saildrone successfully completed an evaluation of the unmanned surface vessel Saildrone Voyager's radar and electronic sensors against surface targets in the vicinity of Key West September 29, 2023.

Part of U.S. 4th Fleet's campaign to inform the hybrid fleet, the evaluation looked at how many Saildrones the fleet would need to cover a given area of water and optimize the probability that the Saildrones would detect suspected drug

runners at sea.

“This successful detection test is the completion of one small step in our campaign to inform the hybrid fleet,” said Capt. David Fowler, U.S. 4th Fleet’s Maritime Operations Center Director. “This is the type of testing and development that we can conduct even as we move toward continuous hybrid operations in the Caribbean.”

Right now continuous operations are underway with Operation Windward Stack. The U.S. 4th Fleet operation deploys long-dwell Saildrone unmanned surface vessels (USVs) to the Windward Passage in the Caribbean order to operationalize the combination of unmanned and manned systems in normal day-to-day operations.

In the coming months, other long-dwell USVs, interceptor USVs, long range UAVs, and VTOL UAVs will join the Saildrones in Operation Windward Stack. These systems will combine with traditional naval surface vessels to expand maritime domain awareness (MDA) and define combinations of unmanned and manned forces that work best for specific operations.

U.S. Naval Forces Southern Command/U.S. 4th Fleet supports U.S. Southern Command’s joint and combined military operations by employing maritime forces in cooperative maritime security operations to maintain access, enhance interoperability, and build enduring partnerships in order to enhance regional security and promote peace, stability and prosperity in the Caribbean, Central and South American region.

# DWIGHT D. EISENHOWER DEPARTS ON DEPLOYMENT

[Release from Carrier Strike Group 2 Public Affairs](#)

\*\*\*\*\*

[By Carrier Strike Group 2 Public Affairs](#)

14 October 2023

NORFOLK, Va. – Aircraft carrier USS Dwight D. Eisenhower (CVN 69) (IKE), departed on a scheduled deployment, Oct. 14.

The strike group is scheduled to deploy to the U.S. European Command area of responsibility where it will engage with allies and partners in support of maritime statecraft, which encompasses naval diplomacy and national efforts to build comprehensive U.S. and allied maritime power.

“Each entity that comprises IKECSG has worked exceptionally hard over the last several months, and we are ready to bring maritime power in support of any tasking,” said Rear Adm. Marc Miguez, commander, Carrier Strike Group (CSG) 2, IKECSG. “Our presence will undoubtedly strengthen relationships with our allies and partners, as we share the goal to deter aggression, and if required, deliver overwhelming combat power.”

The flagship Dwight D. Eisenhower will join guided-missile cruiser USS Philippine Sea (CG 58) and guided-missile destroyer USS Gravelly (DDG 107), who departed Naval Station Norfolk, and guided-missile destroyer USS Mason (DDG 87), who departed Naval Station Mayport, Oct. 13.

The IKECSG is an integrated combat weapons system that delivers superior combat capability to deter, and if necessary, defeat America’s adversaries in support of national security. It is comprised of more than 5,000 Sailors of CSG-2 staff, commanded by Miguez; flagship Dwight D. Eisenhower, commanded by Capt. Christopher Hill; Carrier Air Wing (CVW) 3 squadrons, commanded by Capt. Mitch McCallister; Destroyer Squadron (DESRON) 22 staff and units, commanded by Capt. David Wroe; guided-missile cruiser USS Philippine Sea (CG 58), commanded by Capt. Michelle Nakamura; and the Information Warfare Commander, Capt. Mitchell Finke.

“President Eisenhower once said, ‘never send a battalion to take a hill if a regiment is available.’ As the flagship of the strike group, the Mighty IKE is ready to provide overwhelming air power to deter aggression and promote world peace,” said Hill. “We trained rigorously for this deployment, and we are excited to celebrate the Navy’s 248th birthday by sending the best damn ship in the Navy to sea.”

The strike group’s deployment coincides with the Navy’s birthday weekend, marking 248 years of power, presence, and protection. The aircraft carrier’s deployment coincides with President Eisenhower’s birthday on Oct. 14 and is days ahead

of the aircraft carrier's 46th year of commissioned naval service on Oct. 18. IKECSG's deployment embodies the Navy's historical and long-standing commitment to being forward deployed, highly trained, and dedicated to defending American interests at sea, on land, and in the sky.

The Italian Navy Carlo Bergamini-class frigate ITS Virginio Fasan (F 591) will integrate with IKECSG during the deployment. IKECSG practiced interchangeability and transfer of authority with Fasan during CSG-4-led composite training unit exercise (COMPTUEX) in July.

Squadrons of CVW-3 include the "Gunslingers" of Strike Fighter Squadron (VFA) 105, the "Fighting Swordsmen" of Strike Fighter Squadron (VFA) 32, the "Rampagers" of Strike Fighter Squadron (VFA) 83, the "Wildcats" of Strike Fighter Squadron (VFA) 131, the "Screwtops" of Carrier Airborne Early Warning Squadron (VAW) 123, the "Zappers" of Electronic Attack Squadron (VAQ) 130, the "Dusty Dogs" of Helicopter Sea Combat Squadron (HSC) 7, the "Swamp Foxes" of Helicopter Maritime Strike Squadron (HSM) 74 and the "Rawhides" of Fleet Logistics Support Squadron (VRC) 40.

Ships of DESRON 22 include guided-missile destroyers Mason and Gravelly.

For more information about Dwight D. Eisenhower Carrier Strike Group, head to Facebook (/CSGTWO & /TheCVN69); Instagram (@CarrierStrikeGroupTwo & @TheCVN69); LinkedIn (Carrier-Strike-Group-TWO).

# General Dynamics Delivers Submarine Hyman G. Rickover (SSN 795)

Release from HII

\*\*\*\*\*

GROTON, Conn. (October 11, 2023) – General Dynamics Electric Boat announced today it delivered the nuclear-powered attack submarine Hyman G. Rickover (SSN 795) to the U.S. Navy. Electric Boat is a wholly owned subsidiary of General Dynamics (NYSE:GD).

Hyman G. Rickover is the 22nd submarine of the Virginia Class, which provides the Navy with the capabilities required to retain undersea dominance well into the 21st century.

“The shipbuilders of Electric Boat are proud to deliver Hyman

G. Rickover, the second submarine to be named for the father of the United States Nuclear Navy,” said Kevin Graney, President, General Dynamics Electric Boat. “Admiral Rickover set excellence as the standard for the United States’ nuclear fleet, and we wish the Hyman G. Rickover and her crew a long and distinguished career that honors Admiral Rickover’s legacy.”

Hyman G. Rickover is the fourth of the ten-ship group of Virginia-class submarines known as Block IV. These ships embody a Navy and industry commitment to deliver new submarines to the fleet with advantageous stealth and strike capacity.

Virginia-class submarines displace approximately 7,000 tons, with a hull length of 377 feet and a diameter of 34 feet. Block IV Virginia-class submarines carry Mark 48 advanced capability torpedoes and Tomahawk cruise missiles.

General Dynamics Electric Boat is the prime contractor and lead design yard for the Virginia class program and constructs the ships in a teaming arrangement with HII’s Newport News Shipbuilding in Virginia.

## **VCNO and MCPON Visit Sailors in Mayport, Jacksonville and Key West**

[Release from VCNO Public Affairs](#)

\*\*\*\*\*

From VCNO Public Affairs

KEY WEST, Fla. – Vice Chief of Naval Operations Adm. Lisa Franchetti and Master Chief Petty Officer of the Navy James Honea traveled to Florida Navy installations to visit with Sailors and observe the U.S. Navy’s Hybrid Fleet event, Oct. 11.

Franchetti and Honea opened their trip at Naval Station Mayport, where they held an all-hands call with more than 650 Sailors from around the base. The conversation lasted more than ninety minutes and covered topics like readiness and recruiting, as well as VCNO and MCPON’s priorities.

“What we do every day is all about three things: warfighting, warfighters, and winning,” said Franchetti. “I’m counting on each and every one of you to be focused on your job, and focused on being the best that you can be in everything that

you do.”

After the all-hands call, Franchetti and Honea had lunch with commanding officers and command master chiefs from select Naval Station Mayport commands.

“I ask that our leaders be very clear on what their priorities are, and that they articulate them very well to their Sailors so we are not wasting time or resources,” said Honea. “Then it’s about focusing on those priorities, and making sure that we are talking about those things every day.”

The group then travelled to Naval Air Station Jacksonville, where they visited Unmanned Patrol Squadron 19 (VUP-19). At VUP-19, VCNO and MCPON received briefs on the MQ-4C Triton Unmanned Aircraft System, part of the Navy’s maritime patrol and reconnaissance family of systems. The MQ-4C Triton conducts intelligence, surveillance and reconnaissance missions that pair with the P-8A Poseidon, and it brings increased persistence, capability, and capacity through its multi-sensor mission payload.

The briefing previewed VCNO and MCPON’s afternoon visit to Naval Air Station Key West for the Hybrid Fleet event. Running Oct. 4-13, the event aims to evaluate unmanned aerial and surface systems in order to strengthen and increase warfighter capabilities across the Navy and U.S. Fourth Fleet area of responsibility.

“One of the best ways to change our force is to rapidly operationalize new technologies, new systems, and new tactics, techniques, and procedures,” said Franchetti. “Whether you’re talking about artificial intelligence, cyber, unmanned platforms, directed energy, or hypersonic missiles, we are on the cusp of technological breakthroughs that are going to define future conflict.”

The U.S. Fourth Fleet is developing, fielding and operating a hybrid fleet of manned and unmanned vessels to check the flood

of illicit trafficking and learn how the Navy can more rapidly employ proven cutting-edge technology on the modern battlefield. VCNO and MCPON finished their day with demonstrations and briefings from the U.S. Fourth Fleet Innovation Team and innovative tech companies in attendance.
