

**Amy Johnson Appointed
President of GDIT**

RESTON, Va. – General Dynamics announced today that Amy Johnson has been appointed as president of GDIT, effective November 3.

Johnson is a 27-year veteran of General Dynamics Mission Systems, where she held increasingly senior roles in engineering, engineering management and business leadership across cybersecurity, defense electronics, space and intelligence systems, most recently as vice president and general manager for Space, Cyber and Intelligence. She earned bachelor's and master's degrees in computer science and computer systems engineering.

"Amy has a proven track record of leading teams to solve complex and highly technical challenges for our customers," said Phebe Novakovic, CEO of General Dynamics. "I am confident that her dynamic leadership, operational rigor and deep commitment to our values and culture will deliver value to our customers, employees and shareholders."

GDIT delivers digital modernization, cloud computing, artificial intelligence, cybersecurity and software development solutions to the U.S. federal government, defense, intelligence agencies and other customers. It is a business unit of General Dynamics, a global aerospace and defense company that offers a broad portfolio of products and services in business aviation; ship construction and repair; land combat vehicles, weapons systems and munitions; and technology products and services. General Dynamics employs more than 120,000 people worldwide and generated \$52.6 billion in revenue in 2025. More information is available at gd.com.
