U.S. Marine Corps Forces, Pacific

April 26, 2024

CAMP H.M. SMITH, Hawaii – Lt. Gen. William M. Journey, commander, U.S. Marine Corps Forces, Pacific, made an official

visit to the Republic of Palau April 24-25, after participating in opening ceremonies for Exercise Balikatan in the Philippines.

The Republic of Palau is one of the Compact of Free Association states aligned with the United States, which provides defense, funding, and access to social services. Lt. Gen. Journey's visit to Palau underscores the importance and depth of commitment the United States has for the U.S.-Palau partnership.

"Palau has proven to be a long-standing friend of the United States in the Pacific. We thank President Whipps, Jr. for his steadfast support for the U.S. military presence, which helps maintain a free and open Indo-Pacific," said Lt. Gen. Journey. "We are grateful for the hospitality that Palau shows to the Marine Corps, and are proud of the contributions Marines have made to improving Palau's infrastructure and serving the people of Palau."

Previous deployments to Palau have seen U.S. Marines and Sailors provide expertise in engineering, medical, maritime law enforcement, and explosive ordnance disposal capabilities. Some of the projects Pacific Marines have recently undertaken in Palau include restoration of the Peleliu airstrip, the construction of a weapons firing range, and renovation of the Peleliu World War II Museum, significant because of the upcoming 80th anniversary commemoration of the battle for Peleliu on September 15.

"The Marines have a deep and enduring connection to the people of Palau, both through community service as well as the many Palauans who have served in the Corps," said U.S. Ambassador to Palau Joel Ehrendreich.

Lt. Gen. Journey pledged to build on the long history the Marine Corps shares with the people of Palau.

"We are committed to continuing the long and proud legacy of

the Marine Corps working with the people of Palau as we secure and maintain a Free and Open Indo-Pacific.”

U.S. Marine Corps Forces, Pacific is the largest operational command in the Marine Corps. It comprises two-thirds of the Marine Corps’ active-duty combat forces, collectively known as the “Pacific Marines.” Pacific Marines serve as an expeditionary force-in-readiness. They operate as air-ground-logistics teams, and are forward positioned and actively employed throughout the Indo-Pacific every day. Pacific Marines live and work alongside the joint force and like-minded allies and partners to prevent conflict, respond to crisis, and if the Nation calls, to fight and win.

April 28 Red Sea Update

From U.S. Central Command, April 28, 2024

TAMPA, Fla. – Between 1:48 and 2:27 a.m. (Sanaa time), April 28, U.S. Central Command (USCENTCOM) successfully engaged five airborne unmanned aerial vehicles (UAV) over the Red Sea.

It was determined the UAVs presented an imminent threat to U.S., coalition, and merchant vessels in the region. These actions are taken to protect freedom of navigation and make international waters safer and more secure for U.S., coalition, and merchant vessels.

Red Sea Update

U.S. Central Command, 26 April, 2024

TAMPA, Fla. – At 9:52 a.m. (Sanaa time) on April 25, one anti-ship ballistic missile (ASBM) was launched from Iranian-backed Houthi terrorist-controlled areas of Yemen into the Gulf of Aden. There were no injuries or damage reported by U.S., coalition, or commercial ships.

Separately, between 12:19 p.m. and 4:17 p.m. (Sanaa time), U.S. Central Command (USCENTCOM) successfully engaged and destroyed one unmanned surface vessel (USV) and one unmanned aerial vehicle (UAV) in Houthi-controlled areas of Yemen.

It was determined that the ASBM, USV, and UAV presented an imminent threat to U.S., coalition, and merchant vessels in the region. These actions are taken to protect freedom of navigation and make international waters safer and more secure for U.S., coalition, and merchant vessels.

U.S. Central Command, April 24, 2024

TAMPA, Fla. – At [11:51](#) a.m. (Sanaa time) on April 24, a coalition vessel successfully engaged one anti-ship ballistic missile (ASBM) launched from Iranian-backed Houthi terrorist-controlled areas in Yemen over the Gulf of Aden. The ASBM was likely targeting the MV Yorktown, a U.S.-flagged, owned, and operated vessel with 18 U.S. and four Greek crew members. There were no injuries or damage reported by U.S., coalition, or commercial ships.

Separately, between [12:07](#) pm and [1:26](#) pm, U.S. Central Command (USCENTCOM) successfully engaged and destroyed four airborne unmanned aerial vehicles (UAV) over Houthi-controlled areas of Yemen.

It was determined that the ASBM and UAVs presented an imminent threat to U.S., coalition, and merchant vessels in the region. These actions are taken to protect freedom of navigation and make international waters safer and more secure for U.S., coalition, and merchant vessels.

U.S. Begins Construction on Temporary Pier to Deliver Humanitarian Aid to Gaza

Joint Logistics Over-the-Shore (JLOTS)

- What is JLOTS:

U.S. Army and U.S. Navy forces organized and equipped to conduct joint ship-to-shore operations where fixed port facilities are inadequate or unavailable.

- What JLOTS can do:

Offload equipment and cargo in-stream (offshore) and deliver cargo to a restricted port, an expeditionary floating pier, or a bare beach employing shallow draft transport watercraft.

The Defense Department announced it would implement a Joint Logistics Over-the-Shore capability from the Mediterranean Sea to provide logistics access to Gaza. The capability will allow for the distribution of humanitarian supplies in Gaza, including as many as two million meals a day.

April 25, 2024 | By Joseph Clark, DOD News

U.S. military personnel have begun construction of a temporary pier off the coast of Gaza to deliver critical humanitarian assistance, senior defense and Biden administration officials said today.

Construction of the pier is expected to be completed in early May. Once completed, it will initially facilitate the delivery of an estimated 90 truckloads of international aid into Gaza and scale to up to 150 truckloads once fully operational.

The beginning of construction marks a significant milestone following President Joe Biden's call for the military to conduct the emergency operation during his State of the Union Address last month.

Soldiers from the Army's 7th Transportation Brigade at Joint Base Langley-Eustis, Virginia, and sailors from Naval Beach

Group 1 at Naval Amphibious Base Coronado, California, were tapped to deploy the Defense Department's Joint Logistics Over-the-Shore capability, or JLOTS.

The first of several watercraft used to construct the pier began the weeklong transit to the U.S. Central Command's area of responsibility less than two days after Biden's address.

Officials underscored today that no U.S. boots will be on the ground in Gaza as part of the operation.

The U.S. has coordinated with the Israeli Defense Force to provide force protection for U.S. personnel operating at sea. The U.S. has also coordinated with an IDF engineering unit to receive the pier on the shore in Gaza once the construction at sea is complete.

"The effort to deliver humanitarian assistance from the sea is fully supported by the Israeli Defense Force with whom we have been and will continue to work very closely – from fixing the JLOTS pier to the shore to providing force protection," a senior defense official said. "This effort is fully integrated with the IDF."

The official added that the U.S. is also bringing "significant force protection as a prudent measure" and will continue to closely monitor the security environment to ensure the safety of U.S. forces.

"We assess that the security environment around the area of Gaza that we've chosen to establish the JLOTS site is sufficient to support execution of the mission," the official said. "But importantly, we reassess security every single day. And as he would do in any mission, the commander of U.S. Central Command will make a final determination on moving forward with JLOTS placement based on the security situation at the time."

Delivering the capability involves the complex choreography of

logistics support and landing craft vessels that carry the equipment used to construct an approximately 1,800-foot causeway comprised of modular sections linked together, which is known as a Trident Pier.

The units are also constructing a 72-foot wide by 270-foot long roll-on, roll-off discharge facility, which will remain about three miles off Gaza's shore and enable cargo ships to offload aid shipments at sea prior to being transported to shore.

About 1,000 soldiers and sailors are involved in the operation.

DOD is working closely with the U.S. Agency for International Development, which has begun coordinating international assistance. Aid providers have begun staging cargo in Cyprus for delivery via the maritime corridor once the pier is in place.

"Work on the maritime corridor is progressing along the expected timeline," a senior administration official said. "This is a complex operation which requires close coordination with many partners, and we're grateful for the work of our partners in this effort."

IKE Carrier Strike Group Arrives in the Eastern Mediterranean

From U.S. Naval Forces Europe-Africa, 26 April 2024

ARABIAN SEA – The Dwight D. Eisenhower Carrier Strike Group (IKECSG) arrived in the Eastern Mediterranean while on a pre-announced Department of Defense deployment, April 26.

The Nimitz-class nuclear-powered aircraft carrier USS Dwight D. Eisenhower (CVN 69) and the Arleigh Burke-class guided-missile destroyer USS Gravelly (DDG 107) entered the Eastern Mediterranean after transiting through the Suez Canal, April 26.

CSGs bring to the region additional aviation and surface assets, providing greater flexibility and maritime capability to the U.S. 6th Fleet.

“The Dwight D. Eisenhower Carrier Strike Group has delivered exceptional naval power in the U.S. 5th Fleet for the last five months,” said Rear Adm. Marc Miguez, commander, CSG-2,

IKECSG. "Reentry into the U.S. 6th Fleet is only a small gesture of our ability to project combat superiority to any part of the globe."

While operating in the U.S. 5th Fleet, the IKECSG conducted operations in the Red Sea, Bab Al-Mandeb Strait, Gulf of Aden and Arabian Gulf including Operation Prosperity Guardian and self-defensive strikes into Iranian-backed Houthi-controlled areas of Yemen.

The strike group is commanded by Carrier Strike Group (CSG) 2 and comprised of flagship Dwight D. Eisenhower, Carrier Air Wing (CVW) 3 with its nine squadrons, USS Philippine Sea (CG 58), and Destroyer Squadron (DESRON) 22, with the guided-missile destroyers USS Gravelly (DDG 107) and USS Mason (DDG 87).

Squadrons of CVW-3 include the "Gunslingers" of Strike Fighter Squadron (VFA) 105, the "Fighting Swordsmen" of Strike Fighter Squadron (VFA) 32, the "Rampagers" of Strike Fighter Squadron (VFA) 83, the "Wildcats" of Strike Fighter Squadron (VFA) 131, the "Screwtops" of Carrier Airborne Early Warning Squadron (VAW) 123, the "Zappers" of Electronic Attack Squadron (VAQ) 130, the "Dusty Dogs" of Helicopter Sea Combat Squadron (HSC) 7, the "Swamp Foxes" of Helicopter Maritime Strike Squadron (HSM) 74 and the "Rawhides" of Fleet Logistics Support Squadron (VRC) 40.

IKECSG units departed their homeports of Norfolk, Virginia, and Mayport, Florida, on Oct. 13 & 14 for a scheduled deployment.

For over 80 years, U.S. Naval Forces Europe-Africa (NAVEUR-NAVAF) has forged strategic relationships with allies and partners, leveraging a foundation of shared values to preserve security and stability.

Headquartered in Naples, Italy, NAVEUR-NAVAF operates U.S. naval forces in the U.S. European Command (USEUCOM) and U.S. Africa Command (USAFRICOM) areas of responsibility. U.S. Sixth Fleet is permanently assigned to NAVEUR-NAVAF, and employs maritime forces through the full spectrum of joint and naval operations.

Keel Authenticated for Future USNS Hector A. Cafferata Jr.

From Team Ships Public Affairs, 25 April 2024

SAN DIEGO – The keel for the future USNS Hector A. Cafferata Jr. (ESB 8), a Lewis B. Puller-class Expeditionary Sea Base,

was laid at GD NASSCO shipyard April 25.

The ship will be named for U.S. Marine Corps Reserve Private Hector A. Cafferata Jr., who served with distinction during the Korean War. Surviving the Battle of Chosin Reservoir among those who would be called, "the Chosin Few," Cafferata received the Medal of Honor from President Harry S. Truman for his life-saving heroism during that battle.

The contemporary keel laying ceremony represents the joining together of a ship's modular components at the land level. As part of the ceremony, the keel is authenticated when the sponsors etch their initials into a ceremonial keel plate. The namesake's daughter, Heather Cafferata, and granddaughter, Jessica Cafferata, attended the keel laying ceremony as the ship sponsors. The ceremony represents the connection between a ship and its sponsors, throughout the ship's life.

"We are honored that the late Hector A. Cafferata's Jr.'s legacy will live on through this ship, and the keel laying is a first step of many milestones to come for this ship," said Tim Roberts, Strategic and Theater Sealift program manager, Program Executive Office Ships. "ESBs provide a critical capability to the fleet and provide increased flexibility to our Sailors and Marines."

Expeditionary Sea Base ships are highly flexible platforms used across a broad range of military operations, supporting multiple operational phases. Acting as a mobile sea base, they are a part of the critical access infrastructure that supports deploying forces and supplies to provide prepositioned equipment and sustainment with adaptable distribution capability.

These ships support Aviation Mine Countermeasure and Special Operations Force missions. In addition to the flight deck, the ESB features four aviation operating spots and a hangar capable of supporting MH-53E-equivalent helicopters;

accommodations, workspaces, and ordnance storage for embarked forces; and enhanced command, control, communications, computers, and intelligence (C4I). These ships support embarked force mission planning and execution and have a reconfigurable mission deck area to store embarked force equipment, including mine sleds and Rigid Hull Inflatable Boats (RHIBs).

GD NASSCO is also currently constructing the future USNS Robert E. Simanek (ESB 7) and John Lewis-class Fleet Replenishment Oilers Robert F. Kennedy (T-AO 208), Lucy Stone (T-AO 209), Sojourner Truth (T-AO 210) and Thurgood Marshall (T-AO 211).

As one of the Defense Department's largest acquisition organizations, PEO Ships is responsible for executing the development and procurement of all destroyers, amphibious ships and craft, auxiliary ships, special mission ships, sealift ships and support ships.

First Mine Countermeasures Mission Package Embarked on USS Canberra

A mine countermeasures unmanned surface vehicle is craned aboard the Independence-variant littoral combat ship USS Canberra (LCS 30), as a part of the first embarkation of the Mine Countermeasures (MCM) mission package, April 23. (U.S. Navy photo by MC1 Vance Hand)

[By Program Executive Office Unmanned and Small Combatants \(PEO USC\) Public Affairs](#)

WASHINGTON – The U.S. Navy embarked the first Mine Countermeasures Mission Package (MCM MP) aboard USS Canberra (LCS 30), April 18, service officials announced. With the MCM mission package now onboard LCS 30, the Navy is looking forward to the first MCM Mission Package deployment in Fiscal Year 2025.

As part of the embark process, the Navy installed sensors, unmanned vehicles, support containers and the software that enables Sailors to execute MCM operations from an Independence-variant Littoral Combat Ship. The embarkation marks the formal turnover of the MCM mission package to the ship, signifying the crew is ready to commence onboard

training and maintenance of the mission package in preparation for its first deployment.

“Today, the LCS Mission Modules program delivers to the Fleet a modernized and integrated MCM mission package that removes Sailors from the minefield and allows for the future retirement of legacy MCM ships,” said Capt. Matthew Lehmann, program manager of the LCS Mission Modules (PMS 420) program office.

An integrated suite of unmanned maritime systems and sensors, the MCM mission package locates, identifies, and destroys mines in the littorals while increasing the ship’s standoff distance from the threat area. Embarked with the MCM mission package, an LCS or a vessel of opportunity can conduct the full spectrum of detect-to-engage operations (hunt, neutralize and sweep) against mine threats using sensors and weapons deployed from the MCM Unmanned Surface Vehicle (USV), an MH-60S multi-mission helicopter and associated support equipment.

The MCM mission package achieved Initial Operational Capability (IOC) on March 31, 2023, following rigorous initial operational testing and evaluation (IOT&E) of the full mission package, including the AN/AQS-20 system, during the fall of 2022 aboard USS Cincinnati (LCS 20). With the deployment of the first MCM mission packages in Fiscal Year 2025, the Navy will commence the process of divesting from aging MH-53 helicopters and Avenger Class MCM ships.

PEO Unmanned and Small Combatants leads the Navy’s efforts to provide littoral combat ships with mission-tailored capability to Combatant Commanders to provide assured access against littoral threats, leveraging unmanned naval capabilities for enhanced operational effectiveness.

HII Delivers Virginia-Class Submarine New Jersey to U.S. Navy

NEWPORT NEWS, Va., April 25, 2024 (GLOBE NEWSWIRE) – HII (NYSE: HII) announced today that its Newport News Shipbuilding division has delivered *Virginia*-class fast-attack submarine *New Jersey* (SSN 796) to the U.S. Navy.

New Jersey is the 11th *Virginia*-class submarine delivered by NNS, and the 23rd built as part of the teaming agreement with General Dynamics Electric Boat.

“It is a proud day for our entire team when we deliver a high-quality submarine like *New Jersey* to the fleet,” said Jason Ward, NNS vice president of *Virginia*-class submarine construction. “The mission ahead for *New Jersey* and her crew is clear, and we applaud our shipbuilders for delivering this

critical capability to the fleet, while maintaining our highest standards of safety and quality.”

More than 10,000 shipbuilders from NNS and Electric Boat participated in the construction of *New Jersey*, alongside thousands of suppliers across the country, including more than 100 in New Jersey who support submarine construction. It is the first *Virginia*-class submarine designed and built with crew gender integration.

New Jersey was christened in November 2021 at NNS by ship’s sponsor Susan DiMarco, a New Jersey resident, retired dentist and wife of former Secretary of Homeland Security Jeh Johnson. The submarine is expected to be commissioned later this year.

Coast Guard Cutter Orcas Decommissioned After 35 Years of Service in Coos Bay, Oregon

[U.S. Coast Guard 13th District, April 23, 2024](#)

COOS BAY, Ore. – The Coast Guard decommissioned the U.S. Coast Guard Cutter Orcas (WPB1327) during a ceremony, Tuesday.

Rear Adm. Charles Fosse, the commander of the Thirteenth Coast Guard District, presided over the ceremony honoring the 35 years of service Orcas and its crews provided to the nation.

Commissioned on April 14, 1989, Orcas was the twenty-seventh Island-Class cutter to join the fleet.

Orcas has been stationed in Coos Bay, Oregon, since 1989 and is the sixth Coast Guard cutter to be stationed in Coos Bay since 1935.

The Orcas was a multi-mission platform that conducted operations to support search and rescue response, marine environmental protection, and national defense.

“From training allied nation maritime forces, conducting the largest-ever cocaine seizure in the history of the Pacific Northwest, and saving countless lives and hundreds of millions of dollars’ worth of property on the Pacific Ocean – Orcas has

done it all,” said Lt. Brendan O’Farrell, the commanding officer of the Orcas. “This ship, one of the last of its kind, is an old American-made workhorse built to endure the harsh Pacific waves. I’m extremely proud and blessed to have served with the finest crew in the fleet.”

Coast Guard Station Kodiak Retires its MH-65 Dolphin Helicopters After 36 Years of Service in Alaska

[U.S. Coast Guard 17th District Public Affairs, April 24, 2024](#)

KODIAK, Alaska – The Coast Guard retired the Air Station Kodiak MH-65 Dolphin helicopter fleet during a ceremony,

Tuesday.

Capt. Timothy Williams, commanding officer of Air Station Kodiak, presided over the ceremony honoring the 36 years of service the MH-65 Dolphin airframe and its crews provided to the Arctic region.

Air Station Kodiak currently has a rotary-wing fleet of six MH-60 Jayhawk helicopters. The unit will shift to a rotary-wing ship-and-shore based fleet of nine MH-60 Jayhawks in 2025.

Air Station Kodiak will be the fourth Coast Guard Air Station to transition to a single rotary wing fleet of MH-60 Jayhawk helicopters. Air Stations Borinquen, Traverse City, and New Orleans all recently completed similar transitions.

“For decades, the cutter and helicopter team were the core of the ALPAT mission,” said Cmdr. James Kenshalo, MH-65 Dolphin pilot. “Together they projected force and protection to the most extreme remote regions of our nation’s territories, operating beyond where help could reach. Countless lives have been saved because of these dedicated crews.”

Commissioned in January of 1988, the Alaksa Patrol (ALPAT) mission executed solely by MH-65 Dolphin aircrews provided Coast Guard Cutters with a reliable airborne asset during Alaska Patrols.
