

# USS Hué City Inducted Into Cruiser Modernization Program

An MH-60R Sea Hawk helicopter prepares to land aboard the guided-missile cruiser USS Hué City, which is headed into the Navy's cruiser modernization program. U.S. Navy/Mass Communication Specialist 2nd Class Kayla Cosby  
NORFOLK, Va. – After a quarter-century of worldwide operations, the guided missile cruiser USS Hué City was inducted into the cruiser modernization program on Sept. 30 at Norfolk Naval Base, entering a period of major overhaul, according to a Naval Sea Systems Command (NAVSEA) release.

The program shifts administrative control from Commander, Naval Surface Forces Atlantic, to the Commander, NAVSEA, allowing the ships to undergo modernization to extend their service lives and air-defense commander capabilities.

The modernization program paces the threat through the installation of the latest technological advances in combat systems and engineering, ensuring these ships remain relevant and viable throughout their entire service lives of 40 operational years. Hué City will undergo extensive structural, mechanical and combat systems upgrades and return to the fleet at peak technical readiness, fully equipped for the Sailors who will take her into harm's way.

"The induction of Hué City is a major milestone for the CG Mod program," said Capt. Kevin Byrne, program manager for surface ship modernization. "Her upcoming overhaul will not only extend the life of this critical capability, but will help the Navy on its mission to grow the fleet and expand our warfighting advantage."

Once a ship is inducted into the modernization program, two

smaller maintenance availabilities are performed to remove equipment for replacement and to conduct structural repairs. These availabilities lay the foundation for the ship to receive new and upgraded systems during a longer dry-docking.

“This was a tremendous effort between ship’s force, maintenance team and other stakeholders,” said Lt. Cmdr. Ethan Reber, Hué City’s commanding officer. “From the beginning, lessons learned from ships inducted earlier in the process – Gettysburg, Vicksburg and Anzio – were incorporated effectively into our planning. Our crew is ready to get started and work alongside the maintenance teams to deliver on her next milestone.”

Six of 11 cruisers have been inducted into the modernization program and are in various stages of returning to the fleet with modernized capability. USS Hué City is the seventh cruiser to be inducted and will be equipped with the latest technological advances in combat systems and engineering to ensure she remains warfighting relevant through the 2030s.

## **Elbit Subsidiary Wins \$23 Million Order for Marine Corps Squad Binocular Parts**

HAIFA, Israel – Elbit Systems Ltd.’s U.S. subsidiary, Elbit Systems of America LLC, was awarded delivery order valued at about \$23 million for the supply of systems and various spare components to the U.S. Marine Corps, the company said in an Oct. release. The order will be executed in Roanoke,

Virginia, and will be supplied over the next 10 months.

This order is part of the \$249 million five-year Squad Binocular Night Vision Goggles Indefinite Delivery Indefinite Quantity contract from Sept. 6 that was awarded to the Night Vision business of L3Harris Technologies several days before the finalization of the acquisition of that business activity by Elbit Systems of America.

Under this contract, the U.S. Marine Corps will be supplied with a Squad Binocular Night Vision Goggle system that consists of a high-performance, white phosphor image intensifier binocular, a modular uncooled thermal imaging sensor, and a common external power supply – providing Marines improved mobility and situational awareness during night operations.

## **Explosive Ordnance Technology Division Announces Partnership With Grey Ops**

INDIAN HEAD, Md. – Naval Surface Warfare Center Indian Head Explosive Ordnance Disposal Technology Division (NSWC IHEODTD) announced the signing of a public-private partnership with Grey Ops.

Under this five-year agreement, NSWC IHEODTD and GreyOps will jointly manufacture an explosive desensitizing agent known as Silent Spring, which is a liquid safing fluid (LSF) intended to desensitize primary explosive hazards, most commonly homemade explosives, to allow the explosive ordnance disposal (EOD) warfighter the ability to safely move explosive

materials, increase opportunities for forensic analysis and minimize damage to existing infrastructure.

“This partnership will provide the first responder community access to this unique technology and reduce the hazards faced by EOD personnel during explosive neutralization and removal activities,” said Capt. Scott Kraft, commanding officer of NSWC IHEODTD.

This Navy-patented technology has been in development since 2012. Laboratory and field testing was facilitated through collaboration with the FBI, U.S. Department of Homeland Security and Applied Research Associates. This partnership will provide the first responder community access to this technology and reduce the hazards faced by EOD personnel during explosive neutralization and removal activities.

“These two organizations are leveraging each other’s strengths and creating a better outcome than they could have achieved on their own,” said Tommy Luginbill, co-founder of Grey Ops.

“These types of agreements leverage existing capability, and the transfer of federally developed technology also can have a positive effect on the greater scientific research community, the commercial sector, the economy, consumers and the public,” said Ashley Johnson, NSWC IHEODTD’s technical director.

**NAVFAC Awards \$49.8 Million  
Contract for Facility to**

# Support Littoral Combat Ships at NS Mayport

JACKSONVILLE, Fla. – Naval Facilities Engineering Command (NAVFAC) Southeast last month awarded a \$49.8 million contract to Walsh Federal LLC to build a littoral combat ship (LCS) logistics facility at Naval Station Mayport, Florida, NAVFAC Southeast public affairs announced in a release.

As NS Mayport is going to receive 14 LCSs to the base, construction of an improved logistics facility is expected to support personnel and crew assigned to these ships. The facility will support the LCS program, which includes the LCS operational trainer facility (LTF).

“The LTF is a vital tool for training our Sailors in simulated real-world situations they may encounter while underway,” said Cmdr. Patricia Tyler, NS Mayport’s executive officer. “The new facilities allow teams to effectively train in a safe and controlled environment, providing immediate feedback and lessons learned to our warfighters.”

The contract provides for construction of a new four-story building and renovations to an existing building. Together, the two buildings will house the ashore component of administrative functions for deployed and in-port littoral combat ships as well as a portion of the training component.

The project also includes adjacent road improvements that will connect the logistics facility directly to a new parking garage that is being designed and constructed under a separate contract.

The work started Oct. 1 and is expected to be completed by August 2021.

# Future Aircraft Carrier John F. Kennedy Establishes Crew

The upper bow unit of the future aircraft carrier USS John F. Kennedy is fitted to the primary structure of the ship on July 10 at Huntington Ingalls Industries' Newport News Shipbuilding. Huntington Ingalls Industries/Matt Hildreth  
NEWPORT NEWS, Va. – Forty-three Sailors assigned to the future aircraft carrier John F. Kennedy attended a ribbon-cutting in Newport News, Virginia, on Oct. 1 to establish the ship's crew and open the building where they will work during the ship's construction, Naval Air Forces Atlantic public affairs said in a release.

"Today, we celebrate a truly historic event," said Capt. Todd Marzano, commanding officer of the pre-commissioning unit. "It marks the grand opening of Building 608, where we will work out of until our spaces on the ship are ready [as well as] the official stand-up of our command. And I couldn't be more excited, more motivated and more honored to be standing with you here today as we make naval history."

The ribbon was cut by Marzano with the help of Cmdr. David Skarosi, Kennedy's executive officer, and Master Chief Information Systems Technician Erica Barnett, Kennedy's acting command master chief, in front of Building 608.

"Today is a huge milestone," Marzano said. "We are now one step closer to accomplishing our mission. We will deliver to the fleet a combat-ready aircraft carrier, manned with properly trained warriors, in support of our nation's needs. We'll have a lot of hard work ahead of us, a lot of challenges, and a lot of long days, but with our skills,

talents and dedication, we will be successful in building the best command in the United States Navy.”

Pride in the event and the command was shared by many in attendance, including Information Systems Technician 1st Class Chandler Ragland, the first Sailor to be assigned to the Kennedy.

“The legacy of this ship is going to be around for a very long time, and to be able to say that I was the first plank owner is incredibly rewarding,” Ragland said. “I get to tell my daughter and family members down the road that I was the first one.”

Despite the small size of the crew, productivity among Kennedy’s Sailors is already high.

“Every member of the crew that’s come in after me has put forth everything they’ve got,” Ragland said. “I don’t see people turning down tasks and saying ‘no, that’s out of my realm.’ They’re always willing and ready to lend a hand and get the mission done. Everyone has the same work ethic, and it’s a long road, but we’re going to keep charging down it.”

Marzano added, “These Sailors have been screened and handpicked due to their outstanding professional records. Big Navy realizes the tremendous challenge and hard work we have ahead of us in standing up an aircraft carrier. It’s great for me as the CO, because I get a true A-team of folks.”

The event concluded with the observance of colors and then a cake-cutting.

John F. Kennedy, the second aircraft carrier in the Gerald R. Ford class, is under construction at Huntington Ingalls Industries’ Newport News Shipbuilding.

# Navy to Christen Newest Attack Submarine Oregon

The attack submarine USS John Warner arrives at Naval Submarine Base New London in Groton, Connecticut. The latest of the Virginia class, the USS Oregon, is set to be christened on Oct. 5 in Groton. U.S. Navy/Mass Communication Specialist 1st Class Steven Hoskins

ARLINGTON, Va. – The U.S. Navy will christen its newest attack submarine, the future USS Oregon, during a ceremony Oct. 5 at General Dynamics Electric Boat in Groton, Connecticut, the Defense Department said in a release.

Rep. Greg Walden (R-Ore.) will deliver the ceremony's principal address. The submarine's sponsor is Dana Richardson. She will highlight the ceremony by breaking a bottle of sparkling wine across the bow to formally christen the ship, a time-honored Navy tradition.

"The future USS Oregon will play an important role in the defense of our nation and maritime freedom," said Navy Secretary Richard V. Spencer. "She stands as proof of what teamwork – from civilian to contractor to military – can accomplish. I am confident USS Oregon and her crew will ensure our Navy remains safe and strong to proudly serve our nation's interest for decades to come."

Oregon, a Virginia-class submarine designated SSN 793, is the third Navy ship to honor the state. The first USS Oregon was a brigantine ship purchased in 1841 and used for exploration until 1845.

The second Oregon (Battleship No. 3) was commissioned on July

15, 1896. Known for one of the most dramatic voyages ever undertaken by a Navy ship, Oregon sailed more than 14,000 miles in 66 days, leaving San Francisco in 1898 and travelling south through the Straits of Magellan until finally arriving at Jupiter Inlet, Florida, where she reported for battle in the Spanish-American War. While the ship demonstrated the capabilities of a heavy battleship, it also eliminated any opposition to the construction of the Panama Canal, as the country could not afford two months to send warships from one coast to another in times of emergency. Decommissioned in 1906, she was later recommissioned in 1911 and remained in the reserve, until stricken from the Navy list in 1942.

The new attack sub Oregon is the 20th in the Virginia class and the second Block IV boat in the class. The ship began construction in fall 2014 and is expected to be delivered next fall. Block IV subs include design changes to reduce total ownership cost and increase operational availability by decreasing the planned number of depot availabilities from four to three.

Virginia-class submarines are built to operate in the world's littoral and deep waters while conducting anti-submarine warfare; anti-surface ship warfare; strike warfare; special operation forces support; intelligence, surveillance, and reconnaissance; irregular warfare; and mine warfare missions.

Their inherent stealth, endurance, mobility and firepower directly enable them to support five of the six maritime strategy core capabilities – sea control, power projection, forward presence, maritime security and deterrence.

# Navy to Commission Littoral Combat Ship Cincinnati During Oct. 5 Ceremony

The future littoral combat ship USS Cincinnati underway during acceptance trials. U.S. Navy

ARLINGTON, Va. – The Navy will commission its newest Independence-variant littoral combat ship, the future USS Cincinnati, during a ceremony on Oct. 5 on west pier in Gulfport, Mississippi, the Defense Department said in a release.

The principal speaker will be Rep. Brad Wenstrup (R-Ohio). Former Commerce Secretary Penny Pritzker will serve as the ship's sponsor. The ceremony will be highlighted by a time-honored naval tradition when Pritzker gives the first order to "man our ship and bring her to life!"

"USS Cincinnati and her crew will play an important role in the defense of our nation and maritime freedom," Navy Secretary Richard V. Spencer said.

"She stands as proof of what teamwork – from civilian to contractor to military – can accomplish. This fast, agile platform will deliver her motto, 'Strength in Unity' worldwide thanks to their efforts."

The future USS Cincinnati is the fifth U.S. Navy ship to honor Ohio's third largest city. The first was a stern-wheel casemate gunboat that served during the Civil War and was sunk by Confederate fire on two separate occasions. Raised both times and returned to service, she was decommissioned following the war.

The second Cincinnati was a cruiser commissioned in 1894. She

served extensively in the Caribbean before, during and after the Spanish-American War before being decommissioned in 1919.

The third ship to bear the name was a light cruiser commissioned in 1924 that served around the world and earned a battle star for World War II service that included convoy escort and blockade duty. She was decommissioned in 1945 after the war ended.

The fourth Cincinnati was a Los Angeles-class fast attack submarine commissioned in 1978. The boat served for 17 years before being decommissioned in 1995.

## **VT Group Acquires DELTA Resources**

CHANTILLY, Va. – VT Group has acquired DELTA Resources Inc., a firm that specializes in naval systems engineering and technical services for critical U.S. Navy shipbuilding and fleet modernization programs, VT Group said a release.

Founded in 2000 and headquartered in Alexandria, Virginia, DELTA Resources provides Naval Sea Systems Command and the Navy's program executive offices (PEOs) with C5I and weapons systems engineering, integrated product support and other technical services. DELTA Resources also delivers information technology, cloud implementation and cybersecurity engineering services to a customer base that also includes the U.S. Army and the Defense Information Systems Agency.

"I am excited to welcome the DELTA Resources team to VT Group," said John Hassoun, VT Group's president and CEO.

“This acquisition adds differentiated technical expertise to our portfolio of fleet modernization capabilities and positions VT Group as a leading provider of full life-cycle naval engineering services for the next generation of naval platforms and weapons systems.”

DELTA Resources founder and CEO Maria Proestou added: “I am immensely proud of the DELTA Resources team, their commitment to our customers and the business we’ve built together. This combination is the next chapter in our story.” Proestou will continue to lead DELTA Resources as a subsidiary of VT Group.

---

## **Submarine Group Two Reborn as Response to ‘Great Power Competition’**

NORFOLK, Va. – Taking another step in response to the re-emergence of the ‘great power competition,’ the U.S. Navy re-established Commander, Submarine Group (SUBGRU) Two in Norfolk, Virginia, on Sept. 30 following its hiatus since August 2014, U.S. Submarine Forces public affairs said in a release.

The move follows the re-establishment of commander, U.S. 2nd Fleet, in 2018 and is aimed at enhancing the Navy’s capacity to command and control its undersea warfare forces seamlessly across all of the Atlantic area, from the U.S. eastern seaboard to the Barents Sea and even into the southern Atlantic.

“The security environment continues to grow more challenging and complex – particularly in the North Atlantic,” said Vice

Adm. Charles Richard, commander of Submarine Forces.

“To maintain America’s undersea superiority, we must increase naval power and our readiness for high-end blue water warfare. How we’re organized to command that employment will be a driving factor in our success – that’s why we’re re-establishing Sub Group Two today.”

SUBGRU 2 is commanded by Rear Adm. James Waters, who also assumed duties as commander, Task Force 84. CTF 84 is the theater anti-submarine warfare commander for U.S. Fleet Forces Command.

“Our motto, ‘Praeparavit Regnatura,’ means ready to dominate. We will prepare forces to control the undersea domain through rigorous competitive training and a thorough understanding of our adversaries and the environment where we both operate,” Waters said. “Further, we will innovate and advance the art of theater anti-submarine warfare through complex fleet exercises and war games.”

Additionally, the command can operate as an embedded CTF within C2F when it is activated as a Maritime Command Element and to serve as the TASW commander for commander, U.S. 4th Fleet, as assigned. SUBGRU 2 will have more administrative control responsibilities delegated from Commander, Submarine Force Atlantic.

“As you carry out your day-to-day duties, you must understand that winning decisively in a potential ‘Fourth Battle of the Atlantic’ should be your guiding vision,” said Adm. Christopher Grady, commander of U.S. Fleet Forces Command. “The best way to prevent a fight is to be prepared to win decisively should anyone choose to threaten us. We believe in power for peace.”

---

# Littoral Combat Ship Successfully Launches Naval Strike Missile

USS Gabrielle Giffords launches a Naval Strike Missile on Oct. 1 during exercise Pacific Griffin. The NSM is a long-range, precision-strike weapon that is designed to find and destroy enemy ships. U.S. Navy/Mass Communication Specialist Kenneth Rodriguez Santiago

PEARL HARBOR, Hawaii – The Independence-variant littoral combat ship USS Gabrielle Giffords successfully demonstrated the capabilities of the Naval Strike Missile (NSM) on Oct. 1 during Pacific Griffin, U.S. Pacific Fleet public affairs announced in a release.

Pacific Griffin is a biennial exercise conducted in the waters near Guam aimed at enhancing combined proficiency at sea while strengthening relationships between the U.S. and Republic of Singapore navies.

“Today was a terrific accomplishment for USS Gabrielle Giffords crew and the Navy’s LCS class,” said Cmdr. Matthew Lehmann, the ship’s commanding officer. “I am very proud of all the teamwork that led to the successful launch of the NSM.”

The NSM is a long-range, precision-strike weapon that can find and destroy enemy ships at distances up to 100 nautical miles. The stealthy missile flies at sea-skimming altitude, has terrain-following capability and uses an advanced seeker for precise targeting in challenging conditions.

Rear Adm. Joey Tynch, commander of Logistics Group Western Pacific, who oversees security cooperation for the U.S. Navy in Southeast Asia, said Gabrielle Giffords' deployment sent a crystal-clear message of the continued U.S. commitment to maritime security in the region.

"LCS packs a punch and gives potential adversaries another reason to stay awake at night," Tynch said. "We are stronger when we sail together with our friends and partners, and LCS is an important addition to the lineup."

The NSM aboard Gabrielle Giffords is fully operational and remains lethal. The weapon was first demonstrated on littoral combat ship USS Coronado in 2014. It meets the Navy's over-the-horizon requirements for survivability against high-end threats, demonstrated lethality, easy upgrades and long-range strike capability.

The Gabrielle Giffords deployment marks the first time that an NSM has sailed into the Indo-Pacific region.

Gabrielle Giffords, which is on its maiden deployment, arrived in the 7th Fleet area of responsibility on Sept. 16 for a rotational deployment to the Indo-Pacific region. This marks the first time two LCS have deployed to the Indo-Pacific region at the same time. Gabrielle Giffords is the fifth LCS to deploy to U.S. 7th Fleet, following USS Freedom, USS Fort Worth, USS Coronado and the currently deployed USS Montgomery.

Gabrielle Giffords will conduct operations, exercises and port visits throughout the region as well as work alongside allied and partner navies to provide maritime security and stability, key pillars of a free and open Indo-Pacific.
