

Temporary Pier in Gaza on Track to Be Operational in May

Pier-building begins Construction of the floating JLOTS pier in the Mediterranean is underway. The pier will support USAID and humanitarian partners to receive and deliver humanitarian aid to the people of Gaza. U.S. Transportation Command and U.S. European Command support the movement of humanitarian aid. (Courtesy Photo)

April 29, 2024 | By Matthew Olay, DoD News

A temporary pier the Defense Department is constructing off the Gazan coast to deliver humanitarian aid is on track to establish initial operations soon, the Pentagon announced today.

“We’re scheduled on track to meet our goal of early May,” said Deputy Pentagon Press Secretary Sabrina Singh during a news

media gathering.

DOD originally announced its mission to construct the Joint Logistics Over-the-Shore, or JLOTS, capability on [March 8](#), with a goal of beginning initial delivery operations about 60 days from that date.

DOD officials announced on [April 25](#) that construction of the pier had begun, and recent satellite imagery from Gaza's coastline has shown construction activity in the area.

The components of the JLOTS include a floating pier, an approximately 1,800-foot-long causeway that will be attached to the shore, and a group of logistic support vessels and barges that will transport the aid from the pier to the causeway.

"Right now, you're seeing construction of that floating, temporary pier, and then, you'll start to see construction of the causeway," Singh told reporters. "Eventually, that causeway will be ... pushed into the coastline and secured by the ."

Since announcing the temporary pier would be used in the humanitarian aid mission, DOD officials have repeatedly emphasized that the IDF will provide force protection on and around the JLOTS. No U.S. boots will be on the ground as part of pier operations in Gaza.

"There is an integrated cell with the IDF and our U.S. military to ensure that there is deconfliction happening," Singh said. "And that also helps with the coordination of JLOTS and the pier itself. So, we are confident that we are in a good place."

When the pier is completed, officials anticipate it will initially facilitate the delivery of an estimated 90 daily truckloads of humanitarian aid into Gaza. Once fully operational, that number should jump to about 150 truckloads,

or roughly 2,000,000 meals per day.

Navy Launches Talent Pipeline Expansion in Southern California

Representatives from the U.S. Navy and industry launched the Southern California Talent Pipeline Program in Newport Beach, California, April 26. The Southern California Talent Pipeline Program will engage hundreds of shipbuilding and ship sustainment suppliers across the region to create maritime-focused manufacturing pipelines that revitalize the defense workforce by addressing critical skill gaps.

By Team Submarine Public Affairs, April 30, 2024

WASHINGTON –The U.S. Navy's Submarine Industrial Base (SIB) program launched the Southern California Talent Pipeline Program in Newport Beach, California, April 26.

The Southern California Talent Pipeline Program will engage hundreds of shipbuilding and ship sustainment suppliers across the region to create maritime-focused manufacturing pipelines that revitalize the defense workforce by addressing critical skill gaps.

"The strength of the talent pipeline is as vital as any capability of a submarine," said Program Executive Officer Undersea Warfare Systems Rear Adm. Todd Weeks and executive sponsor, Southern California Talent Pipeline Project. "The skilled tradespeople we need, whether welders, machinists, electricians, and more are the structural foundation that will allow us to build and maintain the world's most advanced submarines."

According to Weeks, over the next 10 years, the SIB will need more than 140,000 skilled employees to build and sustain the Navy's submarine fleet.

The Southern California launch aims to mirror prior Talent Pipeline Program (TPPs) in maritime centers of gravity in Philadelphia, Pennsylvania; Pittsburgh, Pennsylvania; Hampton Roads, Virginia; Long Island, New York; and Boston, Massachusetts.

The Navy and the nation's submarine industrial base are supporting the largest submarine recapitalization effort in nearly 50 years, driving a significant increase in demand across the industrial base. This launch – part of a continued effort to strengthen and expand the Nation's defense workforce – brought together partners from industry, academia, and leaders from the local community to create and sustain a talent pipeline that enables employers to re-capitalize their

workforce through recruiting, hiring, training, and retention.

“As we launch this vital Training Pipeline here in Southern California, it’s important to remember the Submarine Industrial Base isn’t a robotic factory,” said Weeks. “When we talk about the SIB, we’re talking about the workforce. It is the people who are constructing the most advanced submarines in the world and initiatives like these are an investment in the growing workforce, in security, and in stability.

The SIB Program’s TPPs have already proved successful in other parts of the country. Since the first one launched in Pennsylvania in 2021, the five TPPs have supported over 300 small and medium maritime suppliers and facilitated the employment of more than 2,700 individuals. Across the 2023-2024 academic year, the target includes more than 400 companies hiring approximately 3,500 individuals as part of these six TPPs.

GA-ASI Delivers First MQ-9A Extended Range to USMC’s VMUT-2

SAN DIEGO – 30 April 2024 – General Atomics Aeronautical Systems, Inc. (GA-ASI) and the U.S. Marine Corps (USMC) celebrated the delivery of the first MQ-9A Extended Range (ER) Unmanned Aircraft System (UAS) to Marine Unmanned Aerial Vehicle Training Squadron 2 (VMUT-2). The delivery of the MQ-9A ER on March 18, 2024, is part of the Marine Air-Ground Task Force (MAGTF) Unmanned Expeditionary (MUX) Program, which ordered eight MQ-9A ER UAS as part of the ARES Indefinite-Delivery/Indefinite-Quantity (ID/IQ) contract.

“It’s exciting to make this first delivery to VMUT-2, which continues to build the relationship between GA-ASI, the USMC, and NAVAIR (Naval Air Systems Command),” said GA-ASI vice president of DoD Strategic Development Patrick Shortsleeve. “GA-ASI has been a contracted warfighting partner of the USMC for several years and VMUT-2’s ability to produce aircrews for the USMC is a tremendous advancement in the USMC’s organic capability.”

VMUT-2 is a UAS training squadron for the USMC based at Marine Corps Air Station Cherry Point in Havelock, North Carolina.

The MQ-9A ER is designed with field-retrofittable capabilities such as wing-borne fuel pods and reinforced landing gear that

extend the aircraft's endurance to more than 30 hours while further increasing its operational flexibility. The aircraft provides long-endurance, persistent surveillance capabilities with Full-Motion Video and Synthetic Aperture Radar/Moving Target Indicator/Maritime Mode Radar. An extremely reliable aircraft, MQ-9A ER is equipped with a fault-tolerant flight control system and a triple-redundant avionics system architecture. It is engineered to meet and exceed manned aircraft reliability standards.

April 29 Red Sea Update

From U.S. Central Command, April 29, 2024

TAMPA, Fla. — Between 10:00 a.m. and 5:20 p.m. (Sanaa time) on April 29, Iranian-backed Houthi terrorists fired three anti-ship ballistic missiles (ASBM) and three UAVs from Yemen into the Red Sea towards MV Cyclades, a Malta-flagged, Greece-owned vessel. Initial reports indicate there were no injuries and the vessel continued on its way.

Earlier, at 7:49 a.m., U.S. Central Command (USCENTCOM) forces successfully engaged and destroyed one Houthi launched airborne unmanned aerial vehicle (UAV) on a flight path towards USS Philippine Sea and USS Laboon in the Red Sea. There were no injuries or damages reported by U.S., coalition, or merchant vessels.

It was determined the UAV presented an imminent threat to U.S., coalition, and merchant vessels in the region. These actions are taken to protect freedom of navigation and make international waters safer and more secure for U.S., coalition, and merchant vessels.

BlueHalo to Test C-UAS System on Marine Corps JLTV

By Richard R. Burgess, Senior Editor

ARLINGTON, Va. – BlueHalo will be testing its LOCUST Laser Weapon System on a U.S. Marine Corps Joint Light Tactical Vehicle (JLTV), the company’s chief executive officer (CEO) said.

BlueHalo’s primary focus is on defeating Group 1, 2, and 3 unmanned aerial systems (UAS), as well as counter-rocket and counter-mortar systems, said Jonathan Moneymaker, CEO of Blue Halo, in an interview with *Seapower*.

“As the foundation of P-HEL, BlueHalo’s LOCUST Laser Weapon System (LWS) combines precision optical and laser hardware with advanced software, artificial intelligence (AI), and processing to enable and enhance the directed energy “kill

chain,” the company said in a release. “LOCUST LWS addresses the inherent need for mobility and quick deployment—tracking, identifying, and engaging of a wide variety of targets with its hard-kill high energy laser.

“We look at it from an integrated layered defense strategy,” Moneymaker said. “Five years ago, we saw the evolution of drone warfare, today one of the fastest-evolving threat vectors. We wanted to engage that from a variety of modalities. We offer solutions and products that range from passive detection in our Skyview product to RF detect-and-defeat in our Titan product, our LOCUST Laser Weapon System, expanding into more global C2 [command and control], and starting to expand into our next-gen kinetic interceptor.

As of April 2024, BlueHalo had delivered two P-HEL systems to the U.S. Army, which has deployed them to unspecified locations.

“It is most certainly [deployed] in areas of conflict,” Moneymaker said. “It’s real, it’s deployable, it’s reliable, and frankly needed to bring service members home.”

“We’re very proud to be the first operationally deployed [HEL] system,” Moneymaker said, noting that its system has surpassed operational 10,000 hours and that the customer having a system that “has finally reached a level of reliability that they’ve been looking for as they’ve been fielding these capabilities.”

He said that the next expansion would be a mobile high-energy laser weapon – on an infantry squad vehicle or a JLTV. The first mobile system was delivered in late March.

“The JLTV integration will be on the Marine Corps’ JLTV, so we’ve been working with all of the services as it relates to deployment of LOCUST,” he said. “We certainly have been having initial conversations with afloat Navy on how can we deploy these systems in the best configuration to counter some of the

activity we're seeing in the Red Sea."

Moneymaker said he sees great potential in the "proven, ready [P-HEL] system" for naval use with its roll-on/roll-off capability.

The work for the Marine JLTV is through the Department of the Navy's Ground-Based Air Defense program, as well as through the Joint Capabilities Office and U.S. Army Rapid Capabilities and Critical Technologies Office (RCCTO).

Moneymaker said the LOCUST is very effective against a [drone] swarm, noting that the capability is part of the test criteria. The LOCUST uses Wizard artificial intelligence and machine learning for target identification and aimpoint recognition.

The P-HEL is powered by a generator or batteries, and the company is looking at how to tie the HEL into shipboard power.

The company's HEL is built primarily at the BlueHalo campus in Albuquerque, New Mexico, with work expanding to Huntsville, Alabama, and Rockville, Maryland. BlueHalo, headquartered in Arlington, Virginia, employs 2,400 workers and is approaching revenue of \$1 billion annually. The company has other facilities in Dayton, Ohio, and Fort Lauderdale, Florida.

U.S. Coast Guard Cutter Anacapa Decommissioned after

34 Years of Service

From U.S. Coast Guard 13th District, April 29, 2024

SEATTLE – The Coast Guard decommissioned the U.S. Coast Guard Cutter Anacapa (WPB 1335) during a ceremony, Friday, in Port Angeles, Washington.

Rear Adm. Charles Fosse, commander, Coast Guard 13th District, presided over the ceremony honoring the 34 years of service the Anacapa and its crews provided to the nation.

Commissioned in 1990, Anacapa was one of 49 Island-class cutters built in Bollinger Shipyards in Lockport, Louisiana and was originally homeported in Petersburg, Alaska for more than three decades.

“The cutter Anacapa has been a reliable and highly effective

presence in our nation's coastal waters for more than 30 years, conducting life-saving missions, ensuring preservation of precious natural resources and contributing to national security," said Fosse. "I want to thank the crew serving today, and all who served aboard Anacapa over these many years, for their dedication and service to our country."

While homeported in Port Angeles, the Anacapa successfully conducted numerous missions. Notably, in August 2022, the Anacapa rescued three people from a disabled sailboat and conducted an overnight tow of the vessel. Additionally, in April 2023, the Anacapa responded and assisted in the safe evacuation of 600 passengers when the Walla Walla ferry grounded in Rich Passage.

"Even though the Anacapa had a short stay in her Port Angeles home port after cutter Cuttyhunk was decommissioned, she filled the remainder of Coast Guard coverage needed in the Pacific Northwest," said Chief Warrant Officer Holly Campbell, Anacapa's commanding officer. "The crews of the Anacapa have held the highest standard of excellence in serving our area of responsibility with pride, professionalism and resiliency throughout their tours of duty. The Anacapa has stood the watch for 34 years of honorable service to our nation. Fair winds and following seas during your last voyage, Anacapa. Thank you for your service."

Following the decommissioning ceremony, the Anacapa will transit to the Coast Guard Yard in Baltimore, Maryland, and will be placed in the Cutter Transition Division.

Commander Marforpac Visits Palau

U.S. Marine Corps Lt. Gen. William M. Journey, commander, U.S. Marine Corps Forces, Pacific, greets Minister of State for the Republic of Palau Gustav Aitaro, left, and U.S. Ambassador for Palau Joel Ehrendreich, center left, at the Palau International Airport, Apr. 24. Journey traveled to Palau to meet with local and military leaders to discuss regional defense partnerships and opportunities. Palau is one of the Compact of Free Association states aligned with the United States, which provides defense, funding, and access to social services. (U.S. Navy photo by MC1 Samantha Jetzer)

From Deputy AC/S, Communication Strategy & Operations

U.S. Marine Corps Forces, Pacific

April 26, 2024

CAMP H.M. SMITH, Hawaii – Lt. Gen. William M. Journey, commander, U.S. Marine Corps Forces, Pacific, made an official

visit to the Republic of Palau April 24-25, after participating in opening ceremonies for Exercise Balikatan in the Philippines.

The Republic of Palau is one of the Compact of Free Association states aligned with the United States, which provides defense, funding, and access to social services. Lt. Gen. Journey's visit to Palau underscores the importance and depth of commitment the United States has for the U.S.-Palau partnership.

"Palau has proven to be a long-standing friend of the United States in the Pacific. We thank President Whipps, Jr. for his steadfast support for the U.S. military presence, which helps maintain a free and open Indo-Pacific," said Lt. Gen. Journey. "We are grateful for the hospitality that Palau shows to the Marine Corps, and are proud of the contributions Marines have made to improving Palau's infrastructure and serving the people of Palau."

Previous deployments to Palau have seen U.S. Marines and Sailors provide expertise in engineering, medical, maritime law enforcement, and explosive ordnance disposal capabilities. Some of the projects Pacific Marines have recently undertaken in Palau include restoration of the Peleliu airstrip, the construction of a weapons firing range, and renovation of the Peleliu World War II Museum, significant because of the upcoming 80th anniversary commemoration of the battle for Peleliu on September 15.

"The Marines have a deep and enduring connection to the people of Palau, both through community service as well as the many Palauans who have served in the Corps," said U.S. Ambassador to Palau Joel Ehrendreich.

Lt. Gen. Journey pledged to build on the long history the Marine Corps shares with the people of Palau.

"We are committed to continuing the long and proud legacy of

the Marine Corps working with the people of Palau as we secure and maintain a Free and Open Indo-Pacific.”

U.S. Marine Corps Forces, Pacific is the largest operational command in the Marine Corps. It comprises two-thirds of the Marine Corps’ active-duty combat forces, collectively known as the “Pacific Marines.” Pacific Marines serve as an expeditionary force-in-readiness. They operate as air-ground-logistics teams, and are forward positioned and actively employed throughout the Indo-Pacific every day. Pacific Marines live and work alongside the joint force and like-minded allies and partners to prevent conflict, respond to crisis, and if the Nation calls, to fight and win.

April 28 Red Sea Update

From U.S. Central Command, April 28, 2024

TAMPA, Fla. – Between 1:48 and 2:27 a.m. (Sanaa time), April 28, U.S. Central Command (USCENTCOM) successfully engaged five airborne unmanned aerial vehicles (UAV) over the Red Sea.

It was determined the UAVs presented an imminent threat to U.S., coalition, and merchant vessels in the region. These actions are taken to protect freedom of navigation and make international waters safer and more secure for U.S., coalition, and merchant vessels.

USS George Washington Deploys to U.S. Southern Command, Eventually Headed to Japan

NORFOLK (April 25, 2024) The Nimitz-class aircraft carrier USS George Washington (CVN 73) departs Naval Station Norfolk, April 25, 2024, for a deployment to the U.S. Southern Command area of operations as part of Southern Seas 2024. (U.S. Navy photo by MC3 Maxwell Orlosky)

By Richard R. Burgess, Senior Editor

ARLINGTON, Va. – A major homeport shift involving two Nimitz-class aircraft carriers is underway with the April 25, 2024, departure of USS George Washington (CVN 73) from Norfolk, Virginia, to the U.S. Southern Command area of responsibility. The voyage will take the carrier to NAS North Island, California, where it will embark Carrier Air Wing Five (CVW-5) from USS Ronald Reagan and replace that carrier as the one

forward-deployed to the U.S. Seventh Fleet in Yokosuka, Japan.

Embarked in the George Washington are the Carrier Strike Group 10 staff and aircraft and personnel of Carrier Air Wing Seven (CVW-7).

“USS George Washington (CVN 73), along with USS Porter (DDG 78) and USNS John Lenthall (T-AO 189), are scheduled to conduct passing exercises and operations at sea with partner nation maritime forces as the ships circumnavigate South America,” Commander, Naval Air Force Atlantic said in an April 24 Facebook post. “Engagements are planned with Argentina, Brazil, Chile, Colombia, Ecuador, Peru, and Uruguay, with port visits planned for Brazil, Chile, and Peru.”

The George Washington was the forward-deployed carrier based in Japan from 2008 until 2015, when it was replaced in Japan by the Ronald Reagan. In 2017, the George Washington entered a Refueling and Complex Overhaul at the Huntington Ingalls Industries’ Newport News Shipbuilding yard in Virginia, an evolution that took six years, including the duration of the COVID-19 pandemic. The George Washington’s nuclear propulsion plant is fueled to run another 25 years.

Red Sea Update

SEAPOW

The Official Publication of the Navy League of the United States

U.S. Central Command, 26 April, 2024

TAMPA, Fla. – At 9:52 a.m. (Sanaa time) on April 25, one anti-ship ballistic missile (ASBM) was launched from Iranian-backed Houthi terrorist-controlled areas of Yemen into the Gulf of Aden. There were no injuries or damage reported by U.S., coalition, or commercial ships.

Separately, between 12:19 p.m. and 4:17 p.m. (Sanaa time), U.S. Central Command (USCENTCOM) successfully engaged and destroyed one unmanned surface vessel (USV) and one unmanned aerial vehicle (UAV) in Houthi-controlled areas of Yemen.

It was determined that the ASBM, USV, and UAV presented an imminent threat to U.S., coalition, and merchant vessels in the region. These actions are taken to protect freedom of navigation and make international waters safer and more secure for U.S., coalition, and merchant vessels.

U.S. Central Command, April 24, 2024

TAMPA, Fla. – At [11:51](#) a.m. (Sanaa time) on April 24, a coalition vessel successfully engaged one anti-ship ballistic missile (ASBM) launched from Iranian-backed Houthi terrorist-

controlled areas in Yemen over the Gulf of Aden. The ASBM was likely targeting the MV Yorktown, a U.S.-flagged, owned, and operated vessel with 18 U.S. and four Greek crew members. There were no injuries or damage reported by U.S., coalition, or commercial ships.

Separately, between [12:07](#) pm and [1:26](#) pm, U.S. Central Command (USCENTCOM) successfully engaged and destroyed four airborne unmanned aerial vehicles (UAV) over Houthi-controlled areas of Yemen.

It was determined that the ASBM and UAVs presented an imminent threat to U.S., coalition, and merchant vessels in the region. These actions are taken to protect freedom of navigation and make international waters safer and more secure for U.S., coalition, and merchant vessels.
