TAMPA, Fla. – A U.S. Coast Guard cutter, forward deployed to the U.S. Central Command (CENTCOM) area of responsibility, seized advanced conventional weapons and other lethal aid originating in Iran and bound to Houthi-controlled areas of Yemen from a vessel in the Arabian Sea on Jan. 28.

The U.S. Coast Guard Sentinel-class fast-response cutter USCGC Clarence Sutphin Jr. (WPC 1147), assigned to U.S. Naval Forces

Central Command, located the vessel and boarded it in the Arabian Sea. The boarding team discovered over 200 packages that contained medium-range ballistic missile components, explosives, unmanned underwater/surface vehicle (UUV/USV) components, military-grade communication and network equipment, anti-tank guided missile launcher assemblies, and other military components.

The direct or indirect supply, sale or transfer of such aid violates U.N. Security Council Resolution 2216 (as extended and renewed by resolutions 2675 and 2707).

“This is yet another example of Iran’s malign activity in the region, ” said Gen. Michael Erik Kurilla, CENTCOM commander. “Their continued supply of advanced conventional weapons to the Houthis is in direct violation of international law and continues to undermine the safety of international shipping and the free flow of commerce.”

CENTCOM is committed to working with our allies and partners to counter the flow of Iranian lethal aid in the region by all lawful means including U.S. and U.N. sanctions and through interdictions.
