

Coast Guard Accepts Delivery of 49th Fast Response Cutter Douglas Denman

The Coast Guard accepts delivery of the 49th Fast Response Cutter Douglas Denman, in Key West, Florida, May 26, alongside the Denman family. The cutter will be homeported in Ketchikan, Alaska. *U.S. COAST GUARD*

KEY WEST, Fla. – The Coast Guard accepted the Coast Guard Cutter Douglas Denman (WPC 1149), the 24th Fast Response Cutter built by Bollinger Shipyards, during a May 26 ceremony at Coast Guard Sector Key West, the Coast Guard 17th District said June 2.

“We were honored to have Douglas Denman’s son, Doug Jr., and daughter Karen there for the momentous occasion,” said Lt.

Paul Kang, commanding officer of the cutter. "In addition to that, two of Douglas Denman's granddaughters drove down from Georgia with their families."

The cutter, which is 154 feet long and has a crew complement of 24, will be homeported in Ketchikan, Alaska.

The Douglas Denman is scheduled for commissioning in September in Ketchikan. It is the third Fast Response Cutter to be stationed in the Coast Guard's 17th Coast Guard District, which covers the state of Alaska and the North Pacific. The Denman will join the John McCormick (WPC 1121) and the Bailey Barco (WPC 1122), which arrived in Alaska in 2016 and 2017.

Born in Tallapoosa, Georgia, the cutter's namesake joined the U.S. Coast Guard in 1940 and was eventually assigned as a coxswain to the USS Colhoun (DD-85), a Wickes-class destroyer in the U.S. Navy during World War I and later re-designated APD-2 in World War II. On Aug. 30, 1942, the Colhoun was positioned off the coast of Guadalcanal when it was attacked by hostile aircraft. Denman was seriously wounded during the attack but remained at his duty station. When the order was given to abandon ship, Denman and another crew member helped evacuate the crew and get life jackets to those already in the water. Because of Denman's selfless actions, 100 of the 150 officers and staff survived the attack and sinking of Colhoun. Denman received the Silver Star and Purple Heart medals for his heroic efforts. He served for 20 years in the Coast Guard, retiring as a senior chief petty officer in 1961.

The Fast Response Cutter is replacing the aging Island-class 110-foot patrol boats and features advanced command, control, communications, computers, intelligence, surveillance, reconnaissance equipment, and an over-the-horizon cutter boat. The cutter features advanced seakeeping capabilities and can achieve more than 32 mph (28 knots). The cutter has an endurance of five days. The Coast Guard is in the middle of

the FRC acquisition program.

Earlier this year, President Biden signed the Consolidated Appropriations Act for Fiscal Year 2022, which included a \$130 million increase for two additional FRCs, continuing the program beyond its 64-vessel program of record. This is the second time Congress has added FRCs beyond the original 58 vessel program of record.

Douglas Denman is designed for multiple missions, including law enforcement, fisheries enforcement, waterways and coastal security, search and rescue, and national defense.
