

ELBIT AMERICA WINS \$500 MILLION CONTRACT TO CONTINUE SUPPLYING NIGHT VISION TO U.S. MARINES

The Squad Binocular Night Vision Goggle is lightweight, provides critical advantages on the modern battlefield

FORT WORTH, TEXAS – DEC. 7, 2023 – [Elbit America](#) received a five-year Indefinite Delivery/Indefinite Quantity (ID/IQ) contract from the [United States Marine Corps](#) (USMC) to continue producing the Squad Binocular Night Vision Goggle (SBNVG). The competitive contract is worth up to \$500 million, with an initial delivery order for nearly \$127 million. The goggles will be produced in Roanoke, Virginia. The company has delivered more than 15,000 SBNVG systems to the USMC since 2019.

The SBNVG has proven to be a game-changer in modern warfare,

as it is lightweight without compromising capability. The goggles currently provide image intensification, with an enhanced clip-on thermal imager. The set-up allows Marines to operate at night, or in dark buildings and tunnels where one's situational awareness is challenged.

The SBNVG is a helmet-mounted system that provides Marines with increased depth perception, enhanced clarity through high-performance white phosphor image intensifier tubes, a thermal-imaging capability, and more. These features, along with extra-long run times, provide Marines an added edge on the battlefield.

"No matter the light conditions or environment, Marines are tapped for challenging missions. Equipped with Elbit America's Squad Binocular Night Vision Goggles, Marines can quickly understand their surroundings and act," said Erik Fox, Vice President of Warfighter Systems at Elbit America.

"Elbit America is proud of our long history supplying Marines with night vision and electro-optic innovations," said Raanan Horowitz, the company's president and CEO. "We continue to refine our portfolio, offering solutions that enable the networked Warfighter of the future with sophisticated decision aids and display systems that work in all operational environments."
