

Fairbanks Morse Opens Mayport Facility to Support Navy, Coast Guard

Fairbanks Morse's new Mayport Service Center in Jacksonville Beach, Florida. Fairbanks Morse
BELOIT, Wis. and JACKSONVILLE BEACH, Fla. – Fairbanks Morse, a portfolio company of Arcline Investment Management, announced the opening of its 8,000-square-foot Mayport Service Center at 950 10th Street, Building B in Jacksonville Beach, Florida, the company said in a Feb. 16 release.

The facility represents a \$350,000 investment in the community and places Fairbanks Morse in closer proximity to core customers such as Mayport Naval Station, Naval Submarine Base Kings Bay, and other U.S. Navy and U.S. Coast Guard

installations.

“The opening of our Mayport Service Center is another step that Fairbanks Morse is taking to fulfill its promise to deliver world-class service to our customers,” said George Whittier, CEO of Fairbanks Morse. “From this facility, we are stocking a wide range of inventory to make parts available when and where our customers need them. This is just the beginning of our broader plan for a geographic expansion that extends our aftermarket services to help customers meet their mission-critical power needs.”

The Mayport Service Center will be staffed with factory certified, OEM [original equipment manufacturer] technicians to provide local engine, motor and controls maintenance and repair services to improve performance and reliability. Fairbanks Morse’s OEM technicians undergo rigorous qualifications to meet the company’s high standards for delivering best-in-class support.

A wide range of Fairbanks Morse engine and Ward Leonard motor and controls inventory will be available at the Mayport Service Center to reduce the amount of time for installation, repair and maintenance services. The move is part of the company’s renewed emphasis on expediting aftermarket services to military and commercial maritime customers across the nation.
