

HII is Awarded Contract to Execute USS Harry S. Truman Refueling and Complex Overhaul

NEWPORT NEWS, Va. – HII announced today that its Newport News Shipbuilding division has been awarded a \$5,099,973,132 contract for the refueling and complex overhaul (RCOH) of nuclear-powered aircraft carrier USS *Harry S. Truman* (CVN 75). The contract includes options which, if exercised, would bring the cumulative value of this contract to \$5,183,380,744.

“Our team has been diligently working to get ahead on this critical engineering and construction project that will prepare USS *Harry S. Truman* for the second half of her service life,” said Bryan Caccavale, NNS vice president of program management. “When the ship arrives at NNS, we’ll apply that

same diligence to working with our suppliers and Navy partners to ensure a successful recapitalization of CVN 75.”

The RCOH represents nearly a third of all maintenance and modernization in an aircraft carrier’s service life. *Truman*’s RCOH will include refueling the ship’s reactors, as well as extensive modernization work in thousands of compartments and tanks, as well as on most ship systems. In addition, major upgrades will be made in the propulsion plant and combat systems.

Built at NNS, CVN 75 was christened in 1996 and delivered to the Navy in 1998. USS *Harry S. Truman* will be the eighth *Nimitz*-class carrier to undergo RCOH at NNS.
