

Hunt Valve Awarded \$2M by Newport News Shipbuilding for Ford CVN Parts

BELOIT, Wis. – Fairbanks Morse Defense has been awarded a contract by Newport News Shipbuilding to provide essential parts through Hunt Valve for the Ford-class aircraft carriers CVN 78–CVN 81, the company said April 5.

The contract, valued at approximately \$2 million, covers parts that will be delivered during the second and third quarters of 2022. Hunt Valve, acquired by Fairbanks Morse Defense in 2021, manufactures valves and electromechanical actuators for naval defense applications.

Having traditionally been a naval engine supplier, Fairbanks Morse Defense has expanded into a single-source product and service solutions provider for the entire vessel. Over the last 18 months, the defense contractor has been acquiring a number of companies, including Hunt Valve, and currently offers a large array of best-in-class marine technologies, original equipment manufacturer parts and turnkey services for the entire vessel.

“Every ship and every shipyard play a crucial role in advancing American interests and countering our rivals at sea. Fairbanks Morse Defense and our sub-brands are deeply committed to supporting our country’s critical naval operations with American-made OEM parts throughout the ship,” said Fairbanks CEO George Whittier. “In light of the post-pandemic supply chain challenges and uncertainty about the war in Ukraine, NNS is being extremely prudent by stocking the parts necessary.”
