

MARAD Announces \$20 Million for Jacksonville Terminal Modernization

Maritime Administrator Adm. Mark Buzby formally presents a check for \$20 million to Jacksonville for its International Cargo Terminal modernization project. U.S. Department of Transportation

JACKSONVILLE, Fla. – U.S. Department of Transportation Maritime Administration Administrator Adm. Mark Buzby formally presented a check for \$20 million to Jacksonville for the International Cargo Terminal modernization project, the Maritime Administration announced in a release.

U.S. Secretary of Transportation Elaine L. Chao said Nov. 22 that the Trump administration will invest \$900 million in American infrastructure through the Better Utilizing Investments to Leverage Development (BUILD) transportation grants program.

“The administration is targeting BUILD transportation grants to repair, rebuild and revitalize significant infrastructure projects across the country,” Chao said.

Fiscal year 2019 BUILD grants are for investments in surface transportation infrastructure and have been awarded on a competitive basis to projects with a significant impact in their local or regional communities. BUILD funding supports roads, bridges, transit, rail, ports or intermodal transportation.

“An investment in the Port of Jacksonville delivers benefits for the local economy and for American workers. It is a central part of President Trump and Secretary Chao’s belief of investing in infrastructure to grow our economy and create

jobs. This grant will also indirectly help support the jobs of the American civilian mariners who crew military sealift vessels that help us carry the fight wherever we must go," Buzby said.

The International Cargo Terminal Modernization Project will reconstruct and modernize about 100 acres of the SSA Marine cargo terminal on Blount Island across six phases. In addition to repaving, the project will improve stormwater management, install new lighting, signage, and other utilities, and will be designed in a manner to enhance future operations.

Repaving the container yard will restore the terminal to a state of good repair, with long-term maintenance supported by port-generated revenues. The project benefits from a strong public-private partnership, with a broad array of stakeholders collaborating to support and deliver the improvements.

During construction, the terminal will continue to handle container, roll-on/roll-off, breakbulk, and general cargoes, with a significant increase in capacity once the project is completed. The project will also result in operating efficiencies which enhance economic competitiveness.

The program selection criteria encompassed safety, economic competitiveness, quality of life, state of good repair, environmental sustainability, innovation, and partnerships with a broad range of stakeholders. For this round of BUILD grants, the maximum grant award is \$25 million, and no more than \$90 million can be awarded to a single state.
