

Marine Corps Pauses ACV Waterborne Operations

U.S. Marines assigned to the 3rd Assault Amphibian Battalion, 1st Marine Division, conduct waterborne training with an Amphibious Combat Vehicle from shore to loading amphibious transport dock ship USS Anchorage (LPD 23) at Marine Corps Base Camp Pendleton, California, Feb. 12. *U.S. MARINE CORPS / Lance Cpl. Willow Marshall*

ARLINGTON, Va. – Out of an abundance of caution, Lt. Gen. David J. Furness, the deputy commandant of the Marine Corps for Plans, Policies, and Operations, has directed the pause of all waterborne Amphibious Combat Vehicle operations in light of the July 19 ACV training incident at Camp Pendleton, Headquarters Marine Corps announced in a July 20 release.

The incident did not result in injuries to the Marines and sailors aboard the ACVs.

The pause of waterborne operations will allow for an

investigation into the incident and ensure the assault amphibian community can review best practices and procedures to remain capable, safe, and ready, the Corps announced.

“This is the right thing to do,” said Furness. “A pause on ACV waterborne operations will give us time to conduct an investigation, learn from this event, and ensure our assault amphibian community remains ready to support our nation.”

The Marine Corps will continue to conduct ACV land operations, to include live-fire training, during this pause.
