Mercury Systems Receives $2.1 Million Order for RF Amplifiers Required for Navy Program

ANDOVER, Mass. – Mercury Systems Inc. received a $2.1 million order from a leading defense prime contractor for custom-engineered radio frequency (RF) amplifiers required for an advanced naval electronic support program, the company said in a release.

The order was booked in the company's fiscal 2019 third quarter and is expected to be shipped over the next several quarters.

Mercury Systems offers a broad range of RF and microwave product offerings designed and manufactured in its scalable Advanced Microelectronics Centers (AMC) located throughout the United States.

"With co-located engineering and manufacturing resources, our AMC facilities are the ideal solution to deliver highly differentiated custom RF microelectronics with affordable, long-term supply continuity," said Kevin Beals, vice president and general manager of Mercury's RF and Microwave group.

"Receiving this order from

our valued defense prime contractor customer further validates the power of
Mercury’s next-generation business model to support our military forces with
sophisticated microelectronics that are second to none.”
