

Naval Air Warfare Rapid Capabilities Office Approved in HASC Chairman's NDAA Mark

ARLINGTON, Va.— A rapid capabilities office for U.S. naval aviation is included in the chairman's mark for the 2024 National Defense Authorization Act in order to speed up development and delivery of critical technologies and systems to naval aviation forces by using "alternative or rapid acquisition pathways for procurement."

The Naval Air Warfare Rapid Capabilities Office, to be co-located with the Naval Air Systems Command headquarters at

Naval Air Station Patuxent River, Maryland, would have the following missions, according to the draft legislation:

“(1) to contribute to the development and testing of low-cost, rapid reaction targeting and weapon systems, electronic warfare and other non-kinetic capabilities, and integrated targeting solutions to fulfill naval and joint military operational requirements;

(2) to contribute to the rapid development, testing, and fielding of new unclassified and classified naval air warfare capabilities.

The office would be led by a designee of the secretary of the Navy and would report to the chief of naval operations. The office would be overseen by a board of directors to include the secretary of the Navy, the chief of naval operations, the commander, Naval Air Systems Command, and the commander, Naval Air Forces.

“The Secretary of the Navy shall ensure that the head of the Office may use available alternative or rapid acquisition pathways for procurement,” the draft said. “The Joint Capabilities Integration and Development System process shall not apply to acquisitions by the Office.”
