# Navy Awards Boeing \$2.4 <br> Billion <br> P-8A <br> Poseidon Contract 

ARLINGTON, Va. - The U.S. Navy has awarded Boeing a $\$ 2.4$ billion production contract for the next $19 \mathrm{P}-8 \mathrm{~A}$ Poseidon aircraft, the company announced in a Jan. 28 release.

The contract includes 10 aircraft to add to the current inventory of $\mathrm{P}-8 \mathrm{As}$ in the U.S. Navy fleet, all five jets currently under contract for Norway and the four aircraft remaining for the existing United Kingdom contract, bringing the total U.K. acquisition to nine aircraft.

The United Kingdom and Norway are acquiring the Boeing aircraft through the Foreign Military Sales process and will receive a variant designed and produced for the U.S. Navy called the P-8A Poseidon. The United Kingdom will receive its first aircraft this year and Norway will begin receiving aircraft in 2021.

The $\mathrm{P}-8$ is a long-range multimission maritime patrol aircraft capable of broad-area, maritime and littoral operations. A military derivative of the Boeing Commercial Next-Generation 737 airplane, the P-8 combines superior performance and reliability with an advanced mission system that ensures maximum interoperability in the battle space.

The P-8 is militarized with maritime weapons, a modern open mission system architecture, and commercial-like support for affordability. The aircraft has been modified to include a bomb bay and pylons for weapons - two weapons stations on each wing - and can carry 129 sonobuoys. The aircraft is also fitted with an in-flight refueling system. With more than 180,000 flight hours to date, P-8 variants, the P-8A Poseidon and the $\mathrm{P}-8 \mathrm{I}$, patrol the globe performing anti-submarine and
anti-surface warfare; intelligence, surveillance and reconnaissance; humanitarian; and search and rescue missions.
