

Navy Picks HII to Provide Logistics Support for Surface Ships, Subs

NEWPORT NEWS, Va. – Huntington Ingalls Industries' Technical Solutions division was selected by the U.S. Navy to provide integrated logistics support (ILS) for the hull, mechanical and electrical (HM&E) systems and equipment installed on surface ships and submarines, the company announced in an April 1 release.

The indefinite delivery, indefinite quantity (IDIQ) contract has a potential value of \$41 million over five years, if all options are exercised.

"We take great pride in providing our customers around the globe with multiple logistics products and services to help them achieve their missions," said Brad Mason, president of Technical Solutions' Fleet Support business unit. "ILS development, maintenance and deployment to the warfighter is a critical part of how HII sustains our nation's fleet."

The IDIQ contract was awarded by the Naval Surface Warfare Center, Philadelphia Division, which is responsible for all ILS work related to the HM&E systems and equipment installed on Navy surface ships and submarines. Under the direction of the Life Cycle Logistics & Readiness Division, HII will execute services related to technical, process and programmatic support for integrated logistics and technical documentation.
