The future guided-missile destroyer Paul Ignatius is launched at first light on Nov. 12, 2016, at Huntington Ingalls Industries Ingalls Shipbuilding in Pascagoula, Mississippi. U.S. Navy/Andrew Young for HII

ARLINGTON, Va. - The U.S. Navy will

commission its newest Arleigh Burke-class guided missile destroyer, the future

USS Paul Ignatius (DDG 117), during a 10 a.m. EDT ceremony on July 27 at Port

Everglades in Fort Lauderdale, Florida, according to a Defense Department release.

The ship is named in honor of Paul

Robert Ignatius, who served in the Navy during World War II and later

during the administration of President Lyndon B. Johnson as assistant secretary

of defense for installations and logistics from 1964 to 1967 and secretary of

the Navy from 1967 to 1969.

Current Navy Secretary Richard V.

Spencer, who is also performing the duties of deputy secretary of defense, will

deliver the commissioning ceremony's principal address. Ignatius' wife, Nancy,

who passed away earlier this year, is the ship's sponsor. Elisa Ignatius,

granddaughter of Nancy Ignatius, will serve as the ship sponsor's

representative. Elisa Ignatius will honor naval tradition when she gives the

first order to "man our ship and bring her to life!"

"The future USS Paul Ignatius

stands as proof of what the teamwork of all our people — civilian, contractor

and military — can accomplish together," Spencer said. "From the

start of the acquisition process, to the keel laying and christening, to

today's commissioning and the many missions she will fulfill going forward,

this destroyer enhances our capabilities for air, undersea, surface, strike and

ballistic missile defense."

The future USS Paul Ignatius will be the 67th Arleigh Burke-class destroyer and is one of 21 ships under contract for the DDG 51 program. Arleigh Burke-class destroyers conduct a variety of missions from peacetime presence and humanitarian assistance/disaster relief to sea control and power projection.

Built in the Flight IIA configuration, the ship delivers rapid reaction time, high firepower and improved electronic warfare capabilities. The ceremony, using hashtag #USSPaulIgnatius, can be viewed on the Navy Live blog here.
