ARLINGTON, Va. – The coastal patrol ship USS Tempest (PC 2) was decommissioned in ceremonies held March 7 at Naval Support Activity Bahrain after 29 years of service.

The Tempest, the oldest serving PC, is the third PC of the U.S. 5th Fleet to be decommissioned this year. Its retirement was preceded in February by USS Firebolt and USS Typhoon. Lt. Cmdr. Matthew J. Intoccia was Tempest's last commanding officer. Seven PCs remain in service in the 5th Fleet.

The 179-foot-long Tempest was built by Bollinger Shipyards in Lockport, Louisiana, and was commissioned Aug. 21, 1993. After serving off Haiti in 1994 in support of Operations Uphold Democracy and Restore Democracy. After 9/11, the Tempest

patrolled the coast of the United States in support of Operation Noble Eagle.

With the Coast Guard needing more capacity for maritime security patrols, the Navy transferred five PCs to the Coast Guard, first in an "in commission, special" status, then decommissioned for full transfer to the Coast Guard. Tempest became WPC 2 on 1 October 2004. The ship was returned to the Navy on Aug. 22, 2008, and recommissioned into the Navy's fleet as PC 2 on Aug. 23, 2008. The Tempest had been assigned to the 5th Fleet since 2013.

In an interview published on the 5th Fleet website, Intoccia said the "capstone of my time on Tempest is undoubtedly our last patrol. I consider it a culmination of all the hard work and dedication over our past 18 months. Together, with our battle buddy USS Typhoon and our embarked U.S. Coast Guard team, we conducted multiple interdictions with a high seizure yield. In my opinion, we reached the apex of the ship's capability during that patrol, and I could not be more proud of my crew's performance.

"I hope Tempest is remembered as a capable bastion of our nation's commitment to free and unimpeded navigation in the maritime domain, and for her rich legacy of joint and multinational cooperation," he said. "Small in stature and crew but mighty in deed, Tempest has been operated by our country's best during 29 years of U.S. Navy service."
