WASHINGTON—The U.S. State Department has approved a possible Foreign Military Sale to the government of Egypt of Rolling Airframe Missile (RAM) Block 2 tactical missiles and related equipment for an estimated cost of \$197 million, the Defense Security Cooperation Agency (DSCA) said in a Feb. 16 release.

Egypt has requested to buy up to 168 RIM-116C RAM Block 2 missiles, according to the release. “Also included in the possible sale are RAM Guided Missile Round Pack Tri-Pack shipping and storage containers; operator manuals and technical documentation; U.S. government and contractor engineering, technical and logistics support services; and other related elements of logistical and program support.”

The proposed sale will support the Egyptian navy's fast missile craft to provide "significantly enhanced area defense capabilities over Egypt's coastal areas and approaches to the Suez Canal. Egypt will have no difficulty absorbing this equipment into its armed forces since Egypt already operates previously procured RAM Block 1A missiles," the release said.

The principal contractor will be Raytheon Missiles & Defense, Tucson, Arizona.
