

U.S. Pacific Fleet Will Leverage Knowledge, Expertise of Naval Postgraduate School With New Nimitz Research Group

The Naval Postgraduate School and U.S. Pacific Fleet announced the establishment of the Nimitz Research Group on Feb. 16. Under the aegis of NPS' Naval Warfare Studies Institute, the new organization will leverage NPS' interdisciplinary education and research capabilities and institutional knowledge in new ways to meet the needs and emerging challenges of the Pacific Fleet. *U.S. NAVY*

MONTEREY, Calif. – The Naval Postgraduate School at Monterey, California, and Commander, U.S. Pacific Fleet are joining forces to harness educational and research knowledge and expertise specifically as it pertains to the Indo-Pacific region with a new effort, the Nimitz Research Group.

Nimitz Research Group will fall under NPS' Naval Warfare Studies Institute, which will provide NPS faculty and students

who will “serve as an extension of the PACFLT staff in Hawaii by participating in fleet exercises and events and providing additional research capacity and subject matter expertise,” according to an Naval Postgraduate School press release.

The Nimitz Research Group was launched Feb. 16 by the NPS president, retired Vice Adm. Ann E. Rondeau, and Adm. Samuel Paparo, commander of the U.S. Pacific Fleet.

“The establishment of the Nimitz Research Group marks a further evolution in our outstanding partnership with the U.S. Pacific Fleet,” said Rondeau. “We have always seen NPS as a center of excellence and innovation, a place where our faculty and students work together to solve the operational challenges of our fleet and force. Through the Nimitz Research Group, we will be able to provide those solutions by deploying our talent and our experience in direct support of our Pacific Fleet partners.”

According to NPS spokesman Lt. Cmdr. Ed Early, the Nimitz Research Group is modeled after Naval Warfare Studies Institute’s Bucklew Research Group, which already provides similar support to Naval Special Warfare. Early said the Navy SEAL officers who are Bucklew scholars attending NPS on a two-year master’s degree program serve as an extension of Naval Special Warfare Group commands, who in turn benefit from the SEALs’ education, research efforts, interactions with the academic community, and proximity to Silicon Valley.

“The example set by the Bucklew Research Group proved to be an ideal model for PACFLT’s requirements.,” Early said. “As a result, the Nimitz Research Group was conceived with the goal of providing coherence and unity of action for NPS’ support to PACFLT.”

Paparo, himself a graduate of NPS’ Systems Analysis program, wanted to leverage the Bucklew Research Group model to focus the unique capabilities of Naval Postgraduate School faculty

members as well as the operational experience of NPS' 2,500 mid-career officers, senior noncommissioned officers and civilians to support the commander of Pacific Fleet's priorities and research needs.

"The Nimitz Research Group links the intellectual rigor of NPS, its key location in the nation's hub of technical innovation and the expertise of innovative warfighters in the Pacific Fleet to research, develop and implement new and dynamic combat capabilities," said Paparo. "Together we will build critical advantages over our competitors to maximize our strengths – battlespace awareness, agility, maneuverability and collective capabilities of the joint forces."
