

# Undersea Technology Innovation Consortium Awards More Than \$100,000 in Scholarships to Future Undersea Tech Leaders

From The Undersea Technology Innovation Consortium, May 19, 2026

MIDDLETOWN, R.I. – The Undersea Technology Innovation Consortium (UTIC) has awarded more than \$100,000 in scholarship funding this year to 23 graduate and undergraduate students pursuing STEM-related degrees with a focus or interest in ocean, marine, and undersea technology fields.

“UTIC is proud to support these outstanding students as they prepare to become the next generation of undersea tech professionals,” said Molly Donohue Magee, CEO of UTIC. “As undersea systems become increasingly advanced and autonomy becomes more important, developing a strong pipeline of talent with expertise in engineering, robotics, sensing, materials, and intelligent systems is critical. These students represent the future leaders who will ensure the United States’ role as a global leader in undersea technology.”

This year’s scholarship recipients represent 15 universities and colleges across 11 states and include 12 graduate students and 11 undergraduate students. They are pursuing degrees in disciplines including ocean engineering, mechanical engineering, electrical engineering, robotics, computer science, materials science, physics, and environmental science.

Several scholarship recipients have already gained hands-on experience through internships and research opportunities with UTIC member companies and partners, including the Naval Undersea Warfare Center, Naval Surface Warfare Center, SAIC, Woods Hole Oceanographic Institution, Raytheon, General Dynamics Electric Boat, General Dynamics Mission Systems, and BAE Systems.

UTIC launched its scholarship program in 2023 as part of its broader mission to advance workforce development, education, and innovation across the undersea tech ecosystem.
