

USCGC David Duren is the First of Three FRCs to be Homeported in Astoria, Oregon

LOCKPORT, Louisiana – Bollinger Shipyards recently delivered the USCGC David Duren to the U.S. Coast Guard in Key West, Florida. This is the 182nd vessel Bollinger has delivered to the U.S. Coast Guard over a 35-year period and the 56th Fast Response Cutter (FRC) delivered under the current program.

“We’re incredibly proud to deliver the USCGC David Duren, the first of three Fast Response Cutters to be homeported in Astoria, Oregon,” said Bollinger President & CEO Ben Bordelon. “We’re confident that pound for pound, the quality and capabilities of the FRC platform are unmatched and that

this vessel will outperform its mission requirements and expectations in the challenging conditions where it will operate in the Pacific Northwest. Our unique experience building for the Coast Guard is unparalleled and has shown time and time again that we successfully deliver the highest quality vessels on a reliable, aggressive production schedule. We look forward to continuing our historic partnership with the U.S. Coast Guard.”

The USCGC David Duren will be the first of three FRCs to be homeported in Sector Columbia River, which is known as “The Protectors of the Pacific Northwest.” The sector is responsible for coastal safety, security, and environmental protection, as well as protecting and securing vital infrastructure, rescuing mariners in peril at sea, enforcing federal law, maintaining navigable waterways, and responding to all hazards impacting the maritime transportation system along the Oregon coast.

As the U.S. Congress continues to debate Fiscal Year 2024 government funding, the future of the Fast Response Cutter Program remains uncertain. While the House Homeland Security Appropriations Bill included funding for four new FRCs, the Senate bill did not include funding for any new vessels. The prospect for a year-long Continuing Resolution (CR) at last year’s funding level introduces a critical level of uncertainty, as funding levels continue to lag behind the meteoric rise in raw material and input costs.

The Coast Guard’s Fiscal Year 2025 Budget to Congress includes procuring two more FRCs to provide increased Coast Guard presence and engagement with allied and partner countries in the Indo-Pacific region. Last year, Adm. Linda Fagan, the Commandant of the U.S. Coast Guard, said, “The Indo-Pacific is clearly a consequential region for America’s future. The United States Indo-Pacific Strategy identifies an expanded role for the U.S. Coast Guard as a top Administration priority as we seek to ensure a region that is free and open. The U.S.

Coast Guard will continue its long history of operational presence in the region with additional cutter patrols and deployable specialized forces.”

Each FRC is named for an enlisted Coast Guard hero who distinguished themselves in the line of duty. Boatswain’s Mate Master Chief David N. Duren was one of the most iconic figures in the history of Coast Guard surfmen. Considered perhaps the finest boat driver in the history of the modern Coast Guard, he is remembered by his shipmates and mentees not only for his expertise in seamanship, but also for his leadership and character. Between 1979 and 1983, Duren deployed on search and rescue cases more frequently than any other officer-in-charge and, in one year, executed over 250 cases. During this tour, Duren received two Coast Guard Medals for exceptional heroism, and the Douglas A. Munro Inspirational Leadership Award. Perhaps more remarkable was the fact that the personnel under his watch at Depoe Bay earned a total of 24 medals and awards.

ABOUT THE FAST RESPONSE CUTTER PLATFORM

The FRC is an operational “game changer,” according to senior Coast Guard officials. FRCs are consistently being deployed in support of the full range of missions within the United States Coast Guard and other branches of our Armed Services due to its exceptional performance, expanded operational reach and capabilities, and ability to transform and adapt to the mission. FRCs have conducted operations as far as the Marshall Islands – a 4,400 nautical mile trip from their homeport. Measuring in at 154 feet, FRCs have a flank speed of 28 knots, state of the art C4ISR suite (Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance), and stern launch and recovery ramp for a 26-foot, over-the-horizon interceptor cutter boat.
