NAPLES, Italy – The Ohio-class guided-missile submarine USS Georgia (SSGN 729), assigned to Commander, Task Force 69, concluded a series of interoperability training events with Force Reconnaissance Marines from the 2nd Reconnaissance Battalion and special operations forces (SOF) in the Mediterranean Sea, August 5, 2024.

The series of events between joint partners and allied countries demonstrates the ability of Task Force 69 to seamlessly integrate amphibious and special warfare into existing Navy missions in the U.S. 6th Fleet area of operations.

“As our submarine force continues to develop its diverse mission sets, we strengthen our ability to deter threats and ensure global access, security, and stability in the maritime domain,” said Capt. Benjamin Selph, Commander, Task Force 69. “Integration with joint and allied partners enhances our lethality as apex predators against hard targets in the U.S. Sixth Fleet area of operations.”

The purpose of the training was to improve U.S. Marine Corps and SOF integration with conventional naval forces in order to develop and improve tactics, techniques and procedures. Early in the series, Marines from the 2nd Force Reconnaissance Company launched and recovered small craft aboard USS Georgia in order to develop capabilities to execute combined arms attacks, advanced personnel recovery, and expeditionary theater undersea warfare deployments.

“Several of our Marines worked alongside Sailors aboard USS Georgia to facilitate joint operational planning at a level not executed before between the U.S. Marine Corps and the submarine force,” said Major W. Connor Smithson, 2nd Force Reconnaissance Company commander. “Collaboration at this level only acts as a force multiplier to bring out the best of both forces’ capabilities.”

Later in the series, East Coast-based U.S. Naval Special Warfare Operators conducted Submarine-Special Operations Forces interoperability training with USS Georgia, which can host up to 66 SOF personnel, and included participation from the Royal Navy’s Special Boat Service, Norwegian Marinejegerkommandoen, and Italian Gruppo Operativo Incursori.

The training iterations with SOF sought to expand and reinforce SOF interoperability with combined partners and provided a valuable opportunity to build combined SUBSOF communication and control architecture while also conducting critical undersea training and qualifications.

“The scale and importance of the accomplishments made by the teams onboard USS Georgia cannot be over-stated.” said Capt. Selph. “Integration with joint and allied SOF enhances our undersea forces’ ability to respond to any threat with increased speed and lethality.”

USS Georgia is homeported in Kings Bay, Georgia, and is on a routine deployment to the U.S. Sixth Fleet area of operations. While in U.S. Sixth Fleet, Commander, Task Force 69 is responsible for submarine warfare operations in Europe and Africa.

Headquartered in Naples, Italy, U.S. Naval Forces Europe-Africa (NAVEUR-NAVAF) operates U.S. naval forces in the U.S. European Command and U.S. Africa Command areas of responsibility. U.S. Sixth Fleet is permanently assigned to NAVEUR-NAVAF, and employs maritime forces through the full spectrum of joint and naval operations.
